

Documentation of Reimagine I-10 Corridor Study Public Outreach Event #2

Project Location

Interstate Highway 10 (I-10)
El Paso County, Texas
2121-01-095

Project Limits

From the New Mexico State Line to FM 3380

Event Locations

Segment 1	El Paso Community College Northwest Campus	6701 S. Desert Blvd. El Paso, TX 79932
Segment 2	Mesita Elementary School Gymnasium	3307 N. Stanton St. El Paso, TX 79902
Segment 3	El Paso Multipurpose Recreation Center	9031 Viscount Blvd, El Paso, TX 79925
Segment 4	Fabens High School	601 NE Ave G Fabens, TX 79838

Event Dates and Times

El Paso Community College - Tuesday, March 6, 2018 from 5 to 7 p.m.

Mesita Elementary School - Wednesday, March 7, 2018 from 5 to 7 p.m.

El Paso Multipurpose Recreation Center - Tuesday, March 13, 2018 from 5 to 7 p.m.

Fabens High School - Wednesday, March 14, 2018 from 5 to 7 p.m.

Elected Officials in Attendance

Councilperson Peter Svarzbein, City of El Paso, District 1

Total Number of Attendees (approx.)

163

Total Number of Comments

129

Comment Response Matrix

I-10 Corridor Study Public Outreach Event #2 – March 6th, 7th, 13th, and 14th, - Comment / Response Matrix

Comment Number	Commenter Name	Date Received	Source	Comment	Response
COMMENTS SUBMITTED AT MEETING					
1	Arthur Kellum	3/6/18 3/7/18 3/13/18 3/14/18	Written comment	I enjoyed the presentation Suggestions A walking bridge be added at Canutillo Higschool so the residents can have pedestrian access from the northside of I-10	Comment noted.
2	Carlos Delgadillo	3/6/18 3/7/18 3/13/18 3/14/18	Written comment	I like the idea of the fly over on Artcraft, it would be nice if all ramps had them. I do understand that all exit and entrance ramps are going to have turn arounds great idea. I like the concept 3 for the down area. Just have good route signs where people don't get confuse. Also I like the concept 3 & 4 addative lanes	Comment noted.
3	Ivan I. Enrique Jr.	3/6/18 3/7/18 3/13/18 3/14/18	Written comment	Remember to stress the positives with reasonable expectations and the benefits. Newscasts are █ to █ and █ closures. Remember to give short term █ and long term █. Staff are knowledgeable and congenial.	Comment noted.
4	Sito Negron	3/6/18 3/7/18 3/13/18 3/14/18	Written comment	DO NOT eliminate any access to Downtown by the neighborhoods north of DT. Specific to sunset heights, maintain & enhance the three access points to DT – los angeles underpass, & prospect & santa fe overpass	Comment noted.
5	Mike L. Terrazas, Jr.	3/6/18 3/7/18 3/13/18 3/14/18	Written comment	Exit 49 – Ever since the shell truck stop opened there are traffic jams throughout the day running thru the evening. Are there plans for increasing the number of lanes to improve the traffic flow?	The study team is evaluating options to add additional capacity in the form of frontage roads, intersection operations, and additional general-purpose lanes on I-10.
6	Genie Gonzalez-Nicholson	3/6/18 3/7/18 3/13/18 3/14/18	Written comment	Get word out by social media as with El Paso City in 5(min) that goes out weekly thru social media.	TxDOT is utilizing social media through the TxDOT El Paso District Twitter feed (https://twitter.com/txdotelp), TxDOT's Facebook page (https://www.facebook.com/TxDOT), and the project website (http://www.reimaginei10.com/). Please check these sites for the latest information regarding public involvement and project updates.
7	Elena Austin	3/6/18 3/7/18 3/13/18 3/14/18	Written comment	I think it would be a good idea to reach out to the El Paso Board of Realtors (GEPAR) to informed them about these meeting. It would benefit the realtors. I myself found this meeting very informative. I appreciate having an input in the future plans that will impact El Paso.	Comment noted.
COMMENTS SUBMITTED VIA MAIL					
8	Carlos Delgadillo	3/12/2018	Written Comment mailed on March 9, 2018	On entrance and exit ramps if they can be constructed to have more runway. As example the entrance going west at Redd Rd. it has a good size runway. The entrance going east at Yarbrough too short and traffic congest there especially at peak hours. The electronic message signs should also flash time and weather, safety driving tips for all vehicles truck cars motorcycles. And when traffic is congested the signs advise long before the congested site and recommend re routes. Have an app for up to date traffic.	Comment noted.

9	Tracy McIntyre	3/8/2018	Email	Hugo I am so sorry to bother you but I was not able to attend the meeting last night at the Mesita Elementary. I am an opo and my properties are located at 3750 Gateway Blvd East and 3800 Gateway Blvd East. Is there anyway that I could get the info that was presented at the meeting either via email or I can come pick it up at your location. Thank you very much in advance Tracy McIntyre	(Response sent from Mr. Hugo Hernandez via email on 3/8/18): Thank you for reaching out. Reimagine I-10 will have two additional meetings next week and we'll be more than happy to speak to you about the I-10 Study in respect to your properties. Nonetheless, you can also visit our websites www.reimaginei10.com or TXDOT.gov (Keyword: Reimagine I-10) where you can find all information presented at Mesita Elementary School. While at our websites please take a moment to take a quick survey and add comments to the interactive map; the interactive map shows proposed improvement concepts for all segments. All I-10 segments will be presented at our next public meetings, just like at Mesita; I really hope you can make it. Here are the next meeting locations for your convenience.
10	Sito Negron	3/8/2018	Email	Hi Rebecca. I am a resident of Sunset Heights and was at event at Mesita last night. Was wondering if you could send me the slides showing the downtown options regarding the bridges. Thanks.	(Response sent from Mr. Hugo Hernandez via email on 3/9/18): My apologies for not responding earlier; I've been away from my desk. Due to the file size I will be sending it via TXDOT File Dropbox, you should be receiving a separate email shortly. Moreover, you can also visit our websites www.reimaginei10.com or TXDOT.gov (Keyword: Reimagine I-10) where you can find all information presented at Mesita Elementary School. While at our websites please take a moment to take a quick survey and add comments to the interactive map; the interactive map shows proposed improvement concepts for all segments. Have a great day.

11	Gabriel Ayub	2/26/2018		Hugo, It was a pleasure speaking with you this afternoon and I thank you for the informative conversation. If you would kindly send me and email in response regarding our conversation that would be much appreciated. I look forward to meeting you in the near future to further discuss opportunities where we can house your travelers that come into our city that are here visiting TXDOT. As mentioned before I am the President of the hotel association for El Paso and would love to discuss further opportunities for your organization and involvement within our association. Have a great afternoon!	(Response sent from Mr. Hugo Hernandez via email on 2/26/18): As I mentioned over the phone, Reimagine I-10, is a corridor study TxDOT-El Paso District is conducting from Texas/New Mexico state line to FM 3380 (Aguilera International Highway) in Tornillo. The purpose of the study is to analyze and evaluate the current and future transportation needs for the I-10 El Paso corridor. This will not have immediate projects (within a year), but will provide a plan of short-, mid-, and long-term possible improvements and alternatives for the future, over the next 25 years. The study started last summer, a final round of public meetings is planned for later this year and the recommended master plan is expected to be completed by the end of 2018. As you know, we will be conducting a series of four Public Meetings, which purpose is to present projected traffic concerns, possible concept solutions, and equally important public input. It is important for you and other stakeholders to participate; all comments and concerns will be taken into consideration to help us analyze and evaluate for the future I-10. Please feel free to share this information and pass the word around. We appreciate you taking the time to reach out to us and will be terrific if you take some time to visit us at one of our Public Meetings and participate, your feedback is very important. I've included our meeting locations below for your convenience and are also posted at www.TXDOT.gov (Keyword: Reimagine I-10) or at www.reimaginei10.com along with other interactive tools. In the same manner, we will be happy to provide further information about Reimagine I-10, or other TxDOT projects, and participate with your organization. Feel free to contact me for additional information on Reimagine I-10 and/or the TXDOT El Paso Public Information Officers, Lauren Macias-Cervantes or Jennifer Wright, if you need information about other projects.
COMMENTS SUBMITTED ELECTRONICALLY ON INTERACTIVE COMMENT MAP					
12	Anonymous	3/6/2018	Comment submitted electronically on interactive comment map	Add the adaptive lane to the outside instead of inside lane http://maps.google.com/maps?q=31.7829036071979,-106.407566070557	Comment noted
13	Anonymous	3/6/2018	Comment submitted electronically on interactive comment map	I like concept 2 for the downtown area. Having the lanes on northern side of the interstate would limit traffic and increase safety. With the new Hilton on the corner of Santa Fe, the Double tree a block down, and the future Hunt office building a couple blocks away will increase the amount of traffic that already exist. http://maps.google.com/maps?q=31.7610493955732,-106.492881774902	Comment noted.
14	Anonymous	3/7/2018	Comment submitted electronically on interactive comment map	Emergency vehicle access to I-10 or Frontage Road if ramps are removed or changed. http://maps.google.com/maps?q=31.7564881828394,-106.350059509277	Improvements in overall travel time and mobility are expected to benefit emergency vehicles. Potential impacts to emergency vehicle travel time or access will be evaluated as potential design concepts are developed.

15	Anonymous	3/7/2018	Comment submitted electronically on interactive comment map	Removing Porfirio Diaz exit a vital road to Sunset Heights is wrong and does not benefit the community-UTEP Students, Downtown Workers, Concert/Game Attendees, Emergency Vehicles and of course the Residents of Sunset Heights. Another alternative needs to be sought creatively, one which will not infringe on irreplaceable historical buildings and schools. Making Yandell a frontage road will impact churches, schools and residences. The members of this study need to walk the 55 mile project to see what is going to be impacted with visions that looks good on paper yet excludes the human element. More thought needs to be placed on expansion that is inclusive of progress without sacrificing quality of life, investment, and invasion of property investments. Monorail, Trolley, like San Diego, Ca, need consideration to make "once and for all investment" instead of piecemeal construction that eventually becomes more costly to the tax payer. I could very well say, "Do whatever you want since I am not going to be here in 40 years but my children will inherit this problem and our hopefully our home investment." Congestion at Schuster, Downtown is a problem and removing the Porfirio exit will add more congestion to everyone. Get back to the the drawing board and reimagine better as this plan is not good enough. Thank you! http://maps.google.com/maps?q=31.7593435283235,-106.500096917152	Comment noted.
16	Anonymous	3/7/2018	Comment submitted electronically on interactive comment map	keep access point from sunset heights, and neighboring neighborhoods. encourage better walkability and connectivity thru larger sidewalks. enhanced lighting and safer slower speeds. keep i-10 below fast and nimble and responsive to interstate traffic http://maps.google.com/maps?q=31.7606708234703,-106.494437456131	Comment noted.
17	Anonymous	3/7/2018	Comment submitted electronically on interactive comment map	Free way one way at present grade and lower (underground tier) opposite direction. do not close Any over passes All pedestrian FRIENDLY Cars second no racetrack around downtown. http://maps.google.com/maps?q=31.761142891419,-106.492828130722	Comment noted.
18	Anonymous	3/9/2018	Comment submitted electronically on interactive comment map	NMDOT was here! http://maps.google.com/maps?q=32.0009066381404,-106.582789421082	Comment noted.
19	Anonymous	3/9/2018	Comment submitted electronically on interactive comment map	Do not eliminate ramp cut http://maps.google.com/maps?q=31.8449036730978,-106.571706533432	Comment noted.
20	Anonymous	3/9/2018	Comment submitted electronically on interactive comment map	Is building bigger roads worth the impact they have on neighborhoods and pollution? http://maps.google.com/maps?q=31.7604199615852,-106.500520706177	The Reimagine I-10 study is evaluating multiple long-term solutions. Since I-10 will need to be reconstructed, the design team is assessing the existing configuration of I-10 and evaluating opportunities to optimize the corridor through operational improvements, such as ramp modifications and/or auxiliary lanes. By incorporating both operational and capacity improvements, the team's goal is to provide a recommended solution(s) that will reduce congestion and thereby potentially reduce emissions.

29	Anonymous	3/7/2018	Comment submitted electronically on interactive comment map	Generally speaking, we would like to see a monorail getting masses of people from point A to point B throughout the city. Moving people in cars is a waste of energy, it takes up too much space and too many resources. Instead of spending so much money building more and more highways, and destroying neighborhoods let's educate people that it is smart to get rid of their cars and take the monorail. http://maps.google.com/maps?q=31.7713751506284,-106.515197753906	Comment noted.
30	Anonymous	3/7/2018	Comment submitted electronically on interactive comment map	Start now with an ad campaign to share ride, take public transportation etc. to reduce the need for cars. http://maps.google.com/maps?q=31.7672887705025,-106.503524780273	Comment noted.
31	Anonymous	3/7/2018	Comment submitted electronically on interactive comment map	maintain all three access points from sunset heights. add landscaping and lighting to the los angeles underpass to make it a more attractive corridor. http://maps.google.com/maps?q=31.7594073848833,-106.497044563293	Comment noted.
32	Anonymous	3/7/2018	Comment submitted electronically on interactive comment map	supportive of need for additional lanes on i-10 underpass. very concerned about design and functionality of ground level design of area on top of i-10. design needs to be reflective of the communities desire for a new urbanist and active downtown corridor. design should connect and stitch back together uptown from downtown. unintended consequences of 1960's i -10 design cut off the downtown proper from the rest of el paso. the redesign should this unfortunate mistake by looking at decking the area and street design and speeds that are appropriate not just for vehicular use but but multi-modal and pedestrians as well. hundreds of millions of dollars of investment from the public and the private sector have been spent in downtown and the inner core to encourage new urbanist and t.o.d to make el paso more economically competetive for retaining educated workers and companies and this design should be reflective and sensitive to these concerns. look at boulevards or larger sidewalks. street trees. deck park and commerical corridor along street car to encourage this http://maps.google.com/maps?q=31.7614735769331,-106.492168307304	Comment noted.
33	Anonymous	3/7/2018	Comment submitted electronically on interactive comment map	maintain all three access points from sunset heights to downtown. add landscaping and lighting to the corridor. http://maps.google.com/maps?q=31.7594073848833,-106.497473716736	Comment noted.
34	Anonymous	3/7/2018	Comment submitted electronically on interactive comment map	enhance the prospect street bridge, which is currently lighted. add to that. the neighborhood appreciates and uses the corridor. if the bridge is replaced it could even be built wider in order to accommodate more amenities (bridge park/mini highline?) http://maps.google.com/maps?q=31.7607939736014,-106.495027542114	Comment noted.

58	Anonymous	3/14/2018	Comment submitted electronically on interactive comment map	I see the city of El Paso trying to move forward and be a more structured city. We need a monorail system that can move people from and ot all points of the city. From downtown to the far reaches of the lower valley, to the far east, Zaragoza and Montana area to the Northeast MLK and 54 area, to the west side, Canutillo to Downtown. This would definately alleviate our traffic problems along I10 and 54 and Montana. People rely heavily in their cars in this city because Sun Metro isn't as effective. And it's not their fault, it has a lot to do with the way this city is laid out. We have the Franklin mountains and Ft. Bliss deviding this city into essentially, three. If we could get a system that connects all three areas people would start using it. Instead of dropping all that cash into the I10, use that money to invest in a better future for El Paso. http://maps.google.com/maps?q=31.7659752528466,-106.48120880127	Comment noted.

59	Anonymous	3/14/2018	Comment submitted electronically on interactive comment map	None of the options will improve the highway as long as slow drivers are continued to be allowed to poke along in the left lane. Austin fixed that problem decades ago with a vigorous publicity campaign and robust enforcement. City, county, and state police in the El Paso area ignore the drivers who never get out of the left lane. http://maps.google.com/maps?q=31.7559043313827,-106.350746154785	Comment noted.

62	Anonymous	3/14/2018	Comment submitted electronically on interactive comment map	Why would you add a pedestrian walkway next to interstate? This creates safety issues for the pedestrians/bike riders and adds additional costs to something that will not be used by but a handful of people. Take into consideration that it is unlikely that anyone will or should walk through a high traffic interstate corridor. Instead of a pedestrian walkway, add a local rail line going from one end to the other for passenger transportation, this could connect with the city trolley to provide quick and efficient mass transportation from the outer edges of the city to downtown. http://maps.google.com/maps?q=31.8586054426197,-106.578369140625	Sidewalks would be proposed adjacent to the frontage roads, which operate at lower speeds than the freeway. Facilities would provide bicycle and pedestrian connectivity and comply with Americans with Disabilities Act (ADA) requirements.
63	Anonymous	3/14/2018	Comment submitted electronically on interactive comment map	Consider putting in connectors for the left turn movements and several key interchanges so that traffic does not have to sit through the signal. http://maps.google.com/maps?q=31.9089477585565,-106.583840847015	Comment noted.
64	Anonymous	3/14/2018	Comment submitted electronically on interactive comment map	Consider concepts that address accidents on i10. maybe the use of the frontage road or some other concept that would not shut down the i10 lanes. http://maps.google.com/maps?q=31.7709008479085,-106.375336647034	Comment noted.
65	Anonymous	3/16/2018	Comment submitted electronically on interactive comment map	East + Northeast + West light rail system to move traffic (mass people) to other parts of city then they could take (use) bus system http://maps.google.com/maps?q=31.9399994071929,-106.583915948868	Comment noted.

96	Anonymous	3/14/2018	Comment submitted electronically on interactive comment map	With Artcraft being the only direct access road between an International crossing and I-10, making this area with direct flyover access in both direction to I-10 and South on Artcraft would help alleviate much congestion. This congestion would especially be helped when trucks with oversized loads, like the wind turbine blades, are moving through the intersection. Commercial traffic has substantially increased over the last couple of years. Also, the U-turn lanes would drastically reduce congestion in the area for both residents and shoppers going to the new large shopping centers. Lane capacities also need to be addressed. Traffic has increased from El Paso to Las Cruces and Las Cruces to El Paso. http://maps.google.com/maps?q=31.8828826924572,-106.581936478615	Comment noted.

COMMENTS SUBMITTED VIA VIDEO RECORDING					
123	Hal Marquez	3/7/2018	Video comment submitted during meeting	Commenter is generally concerned the increasing number of vehicles on the road and would like to see more of an emphasis on alternative modes of transportation. See Attachment E for full comment.	Comment noted.
124	Victor Vazquez	3/7/2018	Video comment submitted during meeting	Commenter is concerned about how the project is going to affect his property along Gateway East between Piedras and Copia. See Attachment E for full comment.	Right-of- way needs have not been determined at this time. However, as this study develops and alternatives are identified, coordination with adjacent property owners will be conducted.
125	James Shaheen	3/7/2018	Video comment submitted during meeting	Commenter would like to see additional west to east routes in El Paso. See Attachment E for full comment.	Comment noted.
126	Peter Svarzbein	3/7/2018	Video comment submitted during meeting	Commenter is concerned about balancing transportation needs with priorities of the downtown area, particularly connecting uptown and downtown. See Attachment E for full comment.	Comment noted.
127	Sito Negron	3/7/2018	Video comment submitted during meeting	Commenter is concerned with the access points from the Sunset Heights neighborhood to downtown, pedestrian/bike enhancements on the Los Angeles, Santa Fe, and Prospect underpasses, and preserving the connections to downtown via the existing bridges across I-10. See Attachment E for full comment.	Comment noted.
128	Sergio Flores	3/13/2018	Video comment submitted during meeting	Commenter is concerned with the time frame of the project. See Attachment E for full comment.	Comment noted.
129	Leonor Wilson	3/13/2018	Video comment submitted during meeting	Leonor Wilson and I just walked through your section of explaining all the new changes which I think are really great and much needed. The infrastructure is very old. Sometimes we as citizens believe it's very painful because we are inconvenienced but progress is always good. So I think taking into consideration HOV lanes, putting semis with buses is great, fantastic actually. That puts them in a lane they would appreciate and we as drivers would appreciate. Having clear communication to us it's obviously good. I love the Go-10, then we know what's going at any time, giving us warning when closures are about to happen. So I think this is all good for us, you know cause we are growing.	Comment noted.

NOTICE OF PUBLIC OUTREACH EVENT #2

Reimagine I-10 Corridor Study

From the New Mexico State Line to FM 3380 (Aguilera International Highway)

El Paso County, Texas

CSJ: 2121-01-095

The Texas Department of Transportation (TxDOT) El Paso District is conducting a second series of outreach events regarding the Reimagine I-10 Corridor Study progress and updates. TxDOT is evaluating the I-10 corridor from the New Mexico State Line south to FM 3380 (Aguilera International Highway). The purpose of these outreach events is to present projected traffic concerns, possible conceptual solutions, and solicit public input.

The study has been organized into four segments, as described below and depicted on the map:

- (1) Northern Gateway:** from the New Mexico State Line to Executive Center Blvd.
- (2) Downtown:** from Executive Center Blvd. to US 54 (Patriot Freeway)
- (3) Airport:** from US 54 to Loop 375 (Americas Interchange)
- (4) Southern Gateway:** from Loop 375 (Americas Interchange) to FM 3380 (Aguilera International Highway)

One event will be held in each study segment. Please identify the event location and date that works best for you:

SEGMENT	DATE	TIME	LOCATION
1	Tuesday March 6, 2018	5pm to 7pm	El Paso Community College Northwest Campus 6701 S Desert Blvd. El Paso, TX 79932
2	Wednesday March 7, 2018	5pm to 7pm	Mesita Elementary School, Gymnasium 3307 N Stanton St. El Paso, TX 79902
3	Tuesday March 13, 2018	5pm to 7pm	El Paso Multipurpose Recreation Center 9031 Viscount Blvd, El Paso, TX 79925
4	Wednesday March 14, 2018	5pm to 7pm	Fabens High School, Gymnasium 601 NE Ave G, Fabens, TX 79838

The events will be conducted in English. If English is not your primary language and you have difficulty communicating effectively in English, Spanish-language interpretation will be provided. If you have a disability and need assistance, special arrangements can be made to accommodate most needs. Please be aware that advance notice is requested as some accommodations may require time for TxDOT to arrange. If you require accommodation to attend the events, please contact TxDOT El Paso District Public Information Officer, Jennifer Wright, at (915) 790-4200 at least two days before the scheduled event.

If you have any questions or would like to discuss the study in more detail, please contact Hugo Hernandez, TxDOT Project Manager, at (915) 790-4200 or Hugo.Hernandez@txdot.gov.

AVISO DE EVENTO DE DIVULGACIÓN PÚBLICA #2

Estudio de Autopista Reimagine I-10

Desde la línea del estado de Nuevo México hasta
la Autopista FM 3380 (Autopista Internacional Aguilera)

Condado de El Paso, Texas

CSJ:2121-01-095

El Departamento de Transportación de Texas (TxDOT, por sus siglas en inglés), distrito El Paso, llevará a cabo una segunda ronda de divulgación pública con respecto a los avances del Estudio de la Autopista Reimagine I-10. TxDOT está evaluando la autopista I-10 desde el límite de Texas con Nuevo México hacia el sur, hasta la autopista FM 3380 (Autopista Internacional Aguilera). Los objetivos de estos eventos es presentar preocupaciones relacionadas a las proyecciones de tráfico a futuro, proveer posibles soluciones conceptuales, así como solicitar la opinión pública.

El estudio se organizó en cuatro segmentos, tal como se describe a continuación y se muestra en el mapa:

(1) Enlace al Norte: desde el límite de Texas con Nuevo México hasta Executive Center Blvd.

(2) Centro: desde Executive Center Blvd. hasta la carretera US 54 (Autopista Patriota)

(3) Aeropuerto: desde la carretera US 54 (Autopista Patriota) hasta la carretera Loop 375 (Intersección de las Américas)

(4) Enlace al Sur: desde la carretera Loop 375 (Intersección de las Américas) hasta la carretera FM 3380 (Autopista Internacional Aguilera)

Se llevará a cabo un evento en cada segmento del estudio. Por favor, identifique la ubicación del evento y la fecha que mejor le convenga:

SEGMENTO	FECHA	HORA	UBICACIÓN
1	martes, 6 de marzo del 2018	5:00pm a 7:00pm	El Paso Community College Northwest Campus 6701 S Desert Blvd. El Paso, TX 79932
2	miércoles, 7 de marzo del 2018	5:00pm a 7:00pm	Mesita Elementary School, Gimnasio 3307 N Stanton St. El Paso, TX 79902
3	martes, 13 de marzo del 2018	5:00pm a 7:00pm	El Paso Multipurpose Recreation Center 9031 Viscount Blvd, El Paso, TX 79925
4	miércoles, 14 de marzo del 2018	5:00pm a 7:00pm	Fabens High School Gimnasio 601 NE Ave G, Fabens, TX 79838

Los eventos serán en inglés. Si el inglés no es su primer idioma y tiene dificultades para comunicarse eficientemente en inglés, se le proporcionará un servicio de interpretación en español. Si usted tiene una discapacidad y necesita asistencia, se pueden hacer arreglos especiales para cubrir la mayoría de las necesidades. Tenga en cuenta que se requiere un aviso previo ya que algunos arreglos distintos pueden requerir tiempo para que TxDOT se organice. Si necesita arreglos distintos para asistir a los eventos, por favor comuníquese con la Oficial de Información Pública de TxDOT, distrito El Paso, Jennifer Wright, al (915) 790-4200 por lo menos dos días hábiles antes del evento. Si tiene alguna pregunta o desea hablar del estudio en más detalle, comuníquese con Hugo Hernandez, Gerente de Proyecto de TxDOT al (915) 790-4200 o Hugo.Hernandez@txdot.gov.

Subject: You are Invited! Public Outreach Events for Reimagine I-10 Corridor Study / Esta usted Invitado! Evento de Divulgación Publica para el Estudio de la Autopista Reimagine I-10

This email has been sent on behalf of the Texas Department of Transportation - El Paso District office. If you have any questions, please contact Hugo Hernandez, Reimagine I-10 TxDOT Project Manager, at (915) 790-4200 or Hugo.Hernandez@txdot.gov.

The TxDOT El Paso District will be holding four public outreach events regarding the Reimagine I-10 Corridor Study progress and updates. TxDOT is evaluating the I-10 corridor from the New Mexico State Line south to FM 3380 (Aguilera International Highway). The purpose of these outreach events is to present projected traffic concerns, possible conceptual solutions, and solicit public input. The study has been organized into four segments, as described below and depicted on the map in the attached notice:

- (1) **Northern Gateway:** from the New Mexico State Line to Executive Center Blvd.
- (2) **Downtown:** from Executive Center Blvd. to US 54 (Patriot Freeway)
- (3) **Airport:** from US 54 (Patriot Freeway) to Loop 375 (Americas Interchange)
- (4) **Southern Gateway:** from Loop 375 (Americas Interchange) to FM 3380 (Aguilera International Highway)

One event will be held in each study segment:

SEGMENT	DATE	TIME	LOCATION
1	Tuesday March 6, 2018	5pm to 7pm	El Paso Community College Northwest Campus 6701 S Desert Blvd. El Paso, TX 79932
2	Wednesday March 7, 2018	5pm to 7pm	Mesita Elementary School, Gymnasium 3307 N Stanton St. El Paso, TX 79902
3	Tuesday March 13, 2018	5pm to 7pm	El Paso Multipurpose Recreation Center 9031 Viscount Blvd, El Paso, TX 79925

4	Wednesday March 14, 2018	5pm to 7pm	Fabens High School, Gymnasium 601 NE Ave G, Fabens, TX 79838
---	-----------------------------	---------------	--

We invite you or a representative from your office to attend the event location and date that best fits your schedule. So that you have the same information as your constituents, the attached **Public Meeting Notice** will be mailed to adjacent property owners. Please let TxDOT know if any other officials should be contacted about the project.

Este correo ha sido enviado en nombre de TxDOT El Paso. Si tiene alguna pregunta o desea hablar del estudio en más detalle, comuníquese con Hugo Hernandez, Gerente del Proyecto Reimagine I-10 de TxDOT al (915) 790-4200 o Hugo.Hernandez@txdot.gov.

El Departamento de Transportación de Texas (TxDOT, por sus siglas en Ingles), distrito El Paso, llevará a cabo cuatro eventos de divulgación publica con respecto a los avances de Estudio de la Autopista Reimagine I-10 y sus actualizaciones. TxDOT está evaluando la autopista I-10 desde el sur de la línea de estado de Texas con Nuevo México hasta la autopista FM 3380 (Autopista Internacional Aguilera). Los objetivos de estos eventos es presentar preocupaciones relacionadas a las proyecciones de tráfico a futuro, proveer posibles soluciones conceptuales, así como solicitar la opinión pública. El estudio ha sido organizado en cuatro segmentos, como se describe a continuación y representado en el mapa adjunto:

- (1) **Enlace al Norte:** desde el límite de Texas con Nuevo México hasta Executive Center Blvd.
- (2) **Centro:** desde Executive Center Blvd. hasta la carretera US 54 (Autopista Patriota)
- (3) **Aeropuerto:** desde la carretera US 54 (Autopista Patriota) hasta la carretera Loop 375 (Intersección de las Américas)
- (4) **Enlace al Sur:** desde la carretera Loop 375 (Intersección de las Américas) hasta la carretera FM 3380 (Autopista Internacional Aguilera)

Un evento por cada segmento del estudio se realizara en:

SEGMENTO	FECHA	HORA	UBICACIÓN
1	martes 6 de marzo del 2018	5:00pm a 7:00pm	El Paso Community College Northwest Campus 6701 S Desert Blvd. El Paso, TX 79932
2	miércoles 7 de marzo del 2018	5:00pm a 7:00pm	Mesita Elementary School, Gimnasio 3307 N Stanton St. El Paso, TX 79902

3	martes 13 de marzo del 2018	5:00pm a 7:00pm	El Paso Multipurpose Recreation Center 9031 Viscount Blvd, El Paso, TX 79925
4	miércoles 14 de marzo del 2018	5:00pm a 7:00pm	Fabens High School Gimnasio 601 NE Ave G, Fabens, TX 79838

Le invitamos a usted o a un representante de su oficina para que asista a la ubicación y fecha del evento que mejor se adapte a su horario. Para que usted tenga la misma información que sus electores, el adjunto **Aviso de la Divulgación Pública** será enviado por correo postal a los propietarios adyacentes. Por favor, háganos saber si algún otro funcionario debe ser contactado sobre el Estudio.

Summary of Additional Outreach Efforts

Flyer

Flyers were posted at 10 libraries/community centers throughout the project area:

El Paso Public Library, Judge Edward S. Marquez Branch	610 N Yarbrough Dr, El Paso, TX 79915
El Paso Multipurpose Recreation Center	9031 Viscount Blvd, El Paso, TX 79925
El Paso Public Library, Jose Cisneros Cielo Vista Branch	1300 Hawkins Blvd, El Paso, TX 79925
El Paso Public Library, Clardy Fox Branch	5515 Robert Alva Ave, El Paso, TX 79905
El Paso Public Library, Memorial Park Branch	3200 Copper Ave, El Paso, TX 79930
El Paso Public Library, Armijo Branch	620 E 7th Ave, El Paso, TX 79901
El Paso Public Library, Main Branch	501 N Oregon St, El Paso, TX 79901
El Paso Public Library, Doris Van Doren Branch	551 E Redd Rd, El Paso, TX 79912
El Paso Public Library, Westside Branch	125 Belvidere St, El Paso, TX 79912
Sunland Park Library	1000 McNutt Rd Suite A, Sunland Park, NM 88063

In addition, flyers were distributed at Fabens High School prior to the outreach event held there on March 14, 2018, and sent electronically to Independent School Districts throughout the region for inclusion in parent/student emails or newsletters.

Movie Trailer

The 15-second movie trailer was shown during a four-week run at the AMC El Paso, El Paso Premiere Cinema, and Premiere Montwood theaters.

El Paso Marathon

Flyers were included in the El Paso Marathon runner packets and distributed to all registered runners.

El Paso Poppy Festival

The Reimagine I-10 project team distributed seed packets and project information at the El Paso Poppy Festival on March 31, 2018.

Social Media Efforts

TxDOT utilized Twitter and Facebook to provide project information and advertise the public outreach event dates and locations.

Reimagine I-10

If you could make a change to I-10 what would it be?!

Don't just think about it! Share your imagination and concerns with Texas Department of Transportation El Paso District Office at the #ReimagineI10

Earlier this week TxDOT District Engineer Bob Bielek stopped by to discuss this project with me.

For more information on the initiative and community meetings: <http://bit.ly/2G47ZXy>

Rachelle Rivera, Joseph Fierro, Jackie Marie and 34 others like this.

Cruz Onegorena Instead of making the freeway safer and easier to commute it do it harder difficult for people they just don't know.
6w

Edward Gonzales Put flashing lights to warn drivers of an entrance ramp up ahead, some drivers try to get in the same lane as drivers entering the freeway. signs don't help...maybe some big flashing lights
6w

Ricardo Cisneros The person getting in, (merging) is mostly responsible for doing it safely. Cannot expect traffic moving at higher speeds to accommodate a slow driver. People should get defensive driving i to understand traffic patterns. And stop being im first society. Learning to drive correctly and not just because they have a license.

Beat the Traffic

Edward Gonzales I take defensive driving class once a year required by work...and a heads up for drivers already on the freeway would be helpful. I know it's the responsibility of drivers entering butt it doesn't mean other drivers are aware of a car coming into the freeway, a little heads-up wouldn't hurt anybody

6w

Marco A. Quintana How bout putting a HOV express lane like Houston running east to west and vice versa. Helps relieve and ease congestion. Maybe even a double decker to separate the long commuters from the short ones.

6w

3 Replies

Izzy Ortega This guy is a jerk, straight up! These projects should've been started at least ten years ago, when studies showed there would be a huge growth in population on the East and West side! They NEVER listened to the studies and didn't prepare, now we've been "under construction" for the last few years, with no end in sight!

6w

Alfredo Reyes Del Campo Rather not say it 🙄🙄

Beat the TRAFFIC

6w

Alonso Ruiz Double decker hi-way system going east and west.

6w

Lorena Bautista-Doport The people driving in it 🤔🤔🤔

6w

Charlie Bustillos More lanes or double deck congested merging lanes

6w

Robert Gutierrez Wider lanes so that all the drunks have more room to swerve .

6w · Edited

Lisa M Miller I can think of alot but first off let the truckers have their own road way only let smaller size trucks in have more back ways to get home then on gateway and montana haha i know this wont happen make it mandatory that people. Get to home early so the roads are not so jam

6w

Danny Orozco Figure out a way to deal with left lane cruisers. #MoveOver

LEFT LANE FOR PASSING ONLY

Jonas Huffman Traffic isn't even that bad.

Mario Salinas Just finish already

Rick Macias How about a multi level freeway

Jaime Medrano straighten out the snake curve at bassett center. this is where the bottlenecks and accidents happen frequently

James Hahn Their Facebook page is a waste of space

Public invited to discuss makeover of I-10

by Simon Williams
Wednesday, March 14th 2018

TxDOT wants to makeover I-10 from the New Mexico and Texas state line to Tornillo.

(mailto:?subject=A%20link%

EL PASO, Texas (KFOX14) — TxDOT is inviting the public to share their ideas on the Reimagining I-10 project on Wednesday, which will be the final meeting of this series.

TxDOT wants to makeover I-10 from the New Mexico and Texas state line to Tornillo.

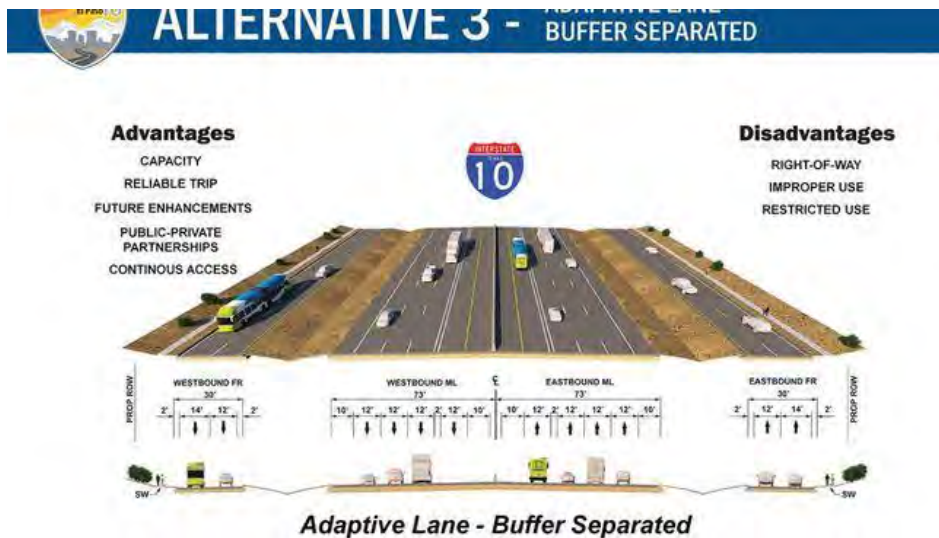

The first, pictured below, focuses on capacity. That includes widening the lanes.

The second alternative keeps the capacity concept, but increases the shoulder to 15 feet wide.

The second alternative keeps the capacity concept, but increases the shoulder to 15-feet wide.

The third alternative includes three outer lanes and an inner restricted lane. In the photo below, you'll see a SunMetro bus in that inner lane. TxDOT says a disadvantage of the project would be improper use of the restricted lane.

The third alternative, includes three outer lanes and an inner restricted lane. In the photo below, you'll see a SunMetro bus in that inner lane. TxDOT says a disadvantage of the project would be improper use of the restricted lane.

The fourth alternative keeps the restricted lanes, but keeps the two inner lanes separated by barriers. TxDOT says this could lead to an increase in crashes.

The fourth alternative keeps the restricted lanes, but keeps the two inner lanes separated by barriers. TxDOT says this could lead to an increase in crashes.

TxDOT separated the project into four segments: The Northern Gateway, Downtown, Airport, and Southern Gateway.

More information and videos from TxDOT on the Reimagining I-10 project can be found by clicking [here \(http://reimaginei10.com/\)](http://reimaginei10.com/).

Wednesday's meeting will only focus on the fourth segment, which is the Southern Gateway segment.

The meeting will begin at 5 p.m. at Fabens High School's gymnasium. There, TxDOT will present projected traffic concerns, present conceptual solutions and ask for public input.

The public is invited to provide an online comment on any portion of I-10 on by clicking [here \(https://reimaginei10map.azurewebsites.net/index.html\)](https://reimaginei10map.azurewebsites.net/index.html). Simply just click on the portion of I-10 that you would like to talk about and submit your idea to TxDOT.

HOW DID YOU HEAR ABOUT THIS MEETING? El Paso Events News Paper

COMMENT(S): I enjoyed the presentation

Suggestions

1) a walking bridge be added outside at Canutillo Highschool / So the residents can have pedestrian access from the westside north side of I-10

~~X) For Modal Support in regard to buses; inside lanes would be an impediment to the flow of traffic as entering and exiting would require cross all lanes of traffic at each designated exit. Buses are good staying in the far right lane with the trucks~~

HOW DID YOU HEAR ABOUT THIS MEETING?

MR. Peter Servastain, Rep #1

COMMENT(S):

I like the idea of the flyover on ARTcraft, it would be nice if all Ramps had them. I do understand that all exit and entrance Ramps are going to have turn arounds great idea. I like the concept 3 for the down area. Just have good Route signs where people don't get confused. Also I like the concept 3+4 Adaptive lanes.

HOW DID YOU HEAR ABOUT THIS MEETING?

Thru city Rep. Peter Servastain

COMMENT(S): on entrance and exit ramps if they can be constructed to have more Runway. as example the entrance going west at Redd Rd it has a good size Runway.

The entrance going east at Yarbrough too short traffic congest there especially at peak hours. The electronic message signs should also flash time and weather, safety driving tips for all vehicles trucks cars motorcycles. And when traffic is congested the signs advise long before the congested site and recommend re routes. Have an APP for up to date traffic.

Tracy,

Thank you for reaching out. Reimagine I-10 will have two additional meetings next week and we'll be more than happy to speak to you about the I-10 Study in respect to your properties. Nonetheless, you can also visit our websites www.reimaginei10.com or TXDOT.gov (Keyword: Reimagine I-10) where you can find all information presented at Mesita Elementary School. While at our websites please take a moment to take a quick survey and add comments to the interactive map; the interactive map shows proposed improvement concepts for all segments.

All I-10 segments will be presented at our next public meetings, just like at Mesita; I really hope you can make it. Here are the next meeting locations for your convenience.

Tuesday March 13, 2018 5 to 7 p.m. El Paso Multipurpose Recreation Center 9031 Viscount Blvd, El Paso, TX, 79925	Wednesday March 14, 2018 5 to 7 p.m. Fabens High School Gymnasium 601 NE Ave G, Fabens, TX 79838

Hugo I am so sorry to bother you but I was not able to attend the meeting last night at the Mesita Elementary. I am an opo and my properties are located at 3750 Gateway Blvd East and 3800 Gateway Blvd East. Is there anyway that I could get the info that was presented at the meeting either via email or I can come pick it up at your location.

Thank you very much in advance

Subject: RE: Reimagine I-10 Corridor Study

Gabriel,

As I mentioned over the phone, Reimagine I-10, is a corridor study TxDOT-El Paso District is conducting from Texas/New Mexico state line to FM 3380 (Aguilera International Highway) in Tornillo. The purpose of the study is to analyze and evaluate the current and future transportation needs for the I-10 El Paso corridor. This will not have immediate projects (within a year), but will provide a plan of short-, mid-, and long-term possible improvements and alternatives for the future, over the next 25 years. The study started last summer, a final round of public meetings is planned for later this year and the recommended master plan is expected to be completed by the end of 2018.

As you know, we will be conducting a series of four **Public Meetings**, which purpose is to present projected traffic concerns, possible concept solutions, and equally important public input. It is important for you and other stakeholders to participate; all comments and concerns will be taken into consideration to help us analyze and evaluate for the future I-10.

Please feel free to share this information and pass the word around. We appreciate you taking the time to reach out to us and will be terrific if you take some time to visit us at one of our Public Meetings and participate, your feedback is very important. I've included our meeting locations below for your convenience and are also posted at www.TXDOT.gov (Keyword: Reimagine I-10) or at www.reimaginei10.com along with other interactive tools.

DATE	TIME	LOCATION
Tuesday March 6, 2018	5pm to 7pm	El Paso Community College Northwest Campus 6701 S Desert Blvd. El Paso, TX 79932
Wednesday March 7, 2018	5pm to 7pm	Mesita Elementary School, Gymnasium 3307 N Stanton St. El Paso, TX 79902

Tuesday March 13, 2018	5pm to 7pm	El Paso Multipurpose Recreation Center 9031 Viscount Blvd, El Paso, TX 79925
Wednesday March 14, 2018	5pm to 7pm	Fabens High School, Gymnasium 601 NE Ave G, Fabens, TX 79838

In the same manner, we will be happy to provide further information about Reimagine I-10, or other TxDOT projects, and participate with your organization. Feel free to contact me for additional information on Reimagine I-10 and/or the TxDOT El Paso Public Information Officers, Lauren Macias-Cervantes or Jennifer Wright, if you need information about other projects.

Hugo,

It was a pleasure speaking with you this afternoon and I thank you for the informative conversation. If you would kindly send me an email in response regarding our conversation that would be much appreciated. I look forward to meeting you in the near future to further discuss opportunities where we can house your travelers that come into our city that are here visiting TxDOT. As mentioned before I am the President of the hotel association for El Paso and would love to discuss further opportunities for your organization and involvement within our association. Have a great afternoon!

default	I like concept 2 for the downtown area. Having the lanes on northern side of the interstate would limit traffic and increase safety. With the new Hilton on the corner of Santa Fe, the Double tree a block down, and the future Hunt office building a couple blocks away will increase the amount of traffic that already exist.		Approved	31.7610494	-106.4928818	3/6/2018 18:00	Item	Lists/Comments
default	Emergency vehicle access to I-10 or Frontage Road if ramps are removed or changed.		Approved	31.75648818	-106.3500595	3/7/2018 16:26	Item	Lists/Comments
	Removing Porfirio Diaz exit a vital road to Sunset Heights is wrong and does not benefit the community-UTEP Students, Downtown Workers, Concert/Game Attendees, Emergency Vechiles and of course the Residents of Sunset Heights. Another alternative needs to be sought creatively, one which will not infringe on irreplaceable historical buildings and schools. Making Yandell a frontage road will impact churches, schools and residences. The members of this study need to walk the 55 mile project to see what is going to be impacted with visions that looks good on paper yet excludes the human element. More thought needs to be placed on expansion that is inclusive of progress without sacrificing quality of life, investment, and invasion of property investments. Monorail, Trolley, like San Diego, Ca, need consideration to make "once and for all investment" instead of piecemeal construction that eventually becomes more costly to the tax payer. I could very well say, "Do whatever you want since I am not going to be here in 40 years but my children will inherit this problem and our hopefully our home investment." Congestion at Schuster, Downtown is a problem and removing the Porfirio exit will add more congestion to everyone. Get back to the the drawing board and reimagine better as this plan is not good enough.							
default	Thank you!		Approved	31.75934353	-106.5000969	3/7/2018 17:11	Item	Lists/Comments

idea	supportive of need for additional lanes on i-10 underpass. very concerned about design and functionality of ground level design of area on top of i-10. design needs to be reflective of the communities desire for a new urbanist and active downtown corridor. design should connect and stitch back together uptown form downtown. unintended consequences of 1960's i -10 design cut off the downtown proper from the rest of el paso. the redesign should this unfortunate mistake by looking at decking the area and street design and speeds that are appropriate not just for vehicular use but but multi-modal and pedestrians as well. hundreds of millions of dollars of investment from the public and the private sector have been spent in downtown and the inner core to encourage new urbanist and t.o.d to make el paso more economically competetive for retaining educated workers and companies and this design should be reflective and sensitive to these concerns. look at boulevards or larger sidewalks. street trees. deck park and commerical corridor along street car to enocruage this		Approved	31.76147358	-106.4921683	3/7/2018 18:00	Item	Lists/Comments

idea	I see the city of El Paso trying to move forward and be a more structured city. We need a monorail system that can move people from and ot all points of the city. From downtown to the far reaches of the lower valley, to the far east, Zaragoza and Montana area to the Northeast MLK and 54 area, to the west side, Canutillo to Downtown. This would definately alleviate our traffic problems along I10 and 54 and Montana. People rely heavily in their cars in this city because Sun Metro isn't as effective. And it's not their fault, it has a lot to do with the way this city is laid out. We have the Franklin mountains and Ft. Bliss deviding this city into essentially, three. If we could get a system that connects all three areas people would start using it. Instead of dropping all that cash into the I10, use that money to invest in a better future for El Paso.		Approved	31.76597525	-106.4812088	3/14/2018 6:49	Item	Lists/Comments
idea	None of the options will improve the highway as long as slow drivers are continued to be allowed to poke along in the left lane. Austin fixed that problem decades ago with a vigorous publicity campaign and robust enforcement. City, county, and state police in the El Paso area ignore the drivers who never get out of the left lane.		Approved	31.75590433	-106.3507462	3/14/2018 7:33	Item	Lists/Comments

idea	Why would you add a pedestrian walkway next to interstate? This creates safety issues for the pedestrians/bike riders and adds additional costs to something that will not be used by but a handful of people. Take into consideration that it is unlikely that anyone will or should walk through a high traffic interstate corridor.							
idea	Instead of a pedestrian walkway, add a local rail line going from one end to the other for passenger transportation, this could connect with the city trolley to provide quick and efficient mass transportation from the outer edges of the city to downtown.		Approved	31.85860544	-106.5783691	3/14/2018 11:16	Item	Lists/Comments
idea	Consider putting in connectors for the left turn movements and several key interchanges so that traffic does not have to sit through the signal.		Approved	31.90894776	-106.5838408	3/14/2018 16:27	Item	Lists/Comments
idea	Consider concepts that address accidents on i10. maybe the use of the frontage road or some other concept that would not shut down the i10 lanes.		Approved	31.77090085	-106.3753366	3/14/2018 16:29	Item	Lists/Comments

	With Artcraft being the only direct access road between an International crossing and I-10, making this area with direct flyover access in both direction to I-10 and South on Artcraft would help alleviate much congestion. This congestion would especially be helped when trucks with oversized loads, like the wind turbine blades, are moving through the intersection. Commercial traffic has substantially increased over the last couple of years. Also, the U-turn lanes would drastically reduce congestion in the area for both residents and shoppers going to the new large shopping centers. Lane capacities also need to be addressed. Traffic has increased from El Paso to Las Cruces and Las Cruces to El Paso.

praise	U-turn is definitely needed here. Either adjust the lights and make one side go at a time, similar to Redd/I-10, or add in a U-turn. Just annoying stopping at a green light because the lane to turn left or go straight is constantly blocked by a car waiting to turn left because of oncoming traffic on the otherside. 2 right :)		Approved	31.88303109	-106.5819722	3/14/2018 8:00	Item	Lists/Comments

Video Comment #1:

My name is Hal Marquez I was born and raised in El Paso. I've lived here all my life. My family came here in 1920. I live in Sunset Heights. I live in a 110-year-old home. I'm a really concerned of what's happening to our city as far as transportation goes and parking. I live in an area that was one of the first planned communities in the United States, Sunset Heights, and now it's being taken over by cars, basically, from the Rio Grande campus and also UTEP and also the ball park. And so we are a small footprint, we have a neighborhood association, that's why we are here today. But other than that, I'm concerned about the whole city. It seems to me that what I've seen today from here, in the short time I've been here, is that I'm very appreciative, first of all, that we have this opportunity. But most of all I'm seeing that we are trying to make room for more and more cars in the next 20 years and what we are going to do about it. You're putting a lot of time, money and energy into building more and more freeways. We need to start educating, I think TxDOT also needs to start educating people that you don't need to have a car. You don't need to have a vehicle that's being parked 75% of the time. It's using a whole lot of energy and it's usually one or two people in the car. And so basically, we are ruining our neighborhood by making more and more highways to get more and more cars from Point A to Point B and nobody is really trying to educate people that you don't really need a car. You know, you can get to where you want to go assuming that we have a transportation venue to get there. So, like monorails, or uber, or even things we haven't even thought of yet as a human race to get people from one point to the next. Because we can't be just taken over by cars, and cars are not the most important quality of life. And there are landmarks and there places we grew up and playing out there would be no more because of cars, people have to start learning more of living closer to where they work, where they eat, where they do things so they can walk, you know, they can take an uber they can take a monorail. So basically, my comment is that lets start focusing more about educating people of the importance of not having to have cars because its creating a huge problem and most of the cars end up in a junk yard within 10 years, that's a problem, also. So I just think that we need to start thinking more about how to get from point A to Point B without using more and more gas driven vehicles that clog up all of our arteries and ruin all of our neighborhoods.

Video Comment #2:

My name is Victor Vazquez and I own a property alongside Gateway east. I have two properties. I use one as my office Gateway east between Piedras and Copia. I'm concerned about how far the freeway may be widened and if it's going to take any of my property. So that's a big concerned of mine. The other concern is being able to get in and out of my property. As it is right now I take Gateway East to get into my property and of course I have to slow down and I have to watch the guy behind me that he's not going to get on top of me to make my turn to get into my property parking. So that's my big concern about what's happening here and that's why I came, to find out it may affect the property I have there. The other concern I have just driving around town is being able to, for one, one of my concerns is the Restler on-ramp to I-10 East. I notice you can take I-10 East but you can't take I-10 West and I wonder why? I thought maybe it was somebody owned the property that you'd have to cross through and they are just holding out and you guys just can't get ahold of it. But I think we need that, because it makes sense to me that if I want to go East and I want to go the same way and go West you should have that option. And you don't have that. Another issue is coming from Juarez and coming into I-54. That's a problem. Taking I-154 if I want to take the one from Juarez going to the East, there's no ramp. There's no ramp to go that way. I understand its coming. It's definitely needed cause you go West as you take Montana and you turnaround there and then you can go West but you can't go East. the other one is going from my office to go to Juarez. Or even, my office to go to Juarez. I gotta take I-10, I mean, Gateway East, to Copia then I'll take Copia down to , like, I think it's Rivera. Take Rivera to a little street that crosses over the Franklin Canal and then get on the access way that's coming off of 54 to get to Juarez. That's a problem. And another problem is wanting to go to from my office or even just coming on I-10 heading west to east, you wanna take Loop 375. That's not easy to do either. You gotta take I-10 and take

it as if you're going to Juarez. And then you gotta get off, follow everybody who is trying to get across to Juarez to get to Paisano, then crossover to get to 375. And that's [inaudible]. So those are a few of my concerns.

Off camera: Could you say where your office is? I know you kind of gave a general bounds. But, what street, cross street is it in between?

I'm between Piedras and Copia and more narrow between San Marcial and Estrella. You're not going to come and condemn me?

Off camera: Oh no no. We just, from an access point, to understand the comment, we can make sure we can understand some of what you were talking about going out the back way.

Video Comment #3:

Hi, I'm James Shaheen. And I like the way you showed the public here everything like this. It's great. Now what's going on, and what's going to come up in the future. there's somethings in the past they've talked about different things you know like, sometimes how trucks come out TransMountain to get from west side to the northeast about going around town and stuff. I was asking some of them what's the possibility of doing an Anthony Gap and making that better because there's a lot of land there. And they were saying, between the 2 states, that's the problem. That would make an excellent thing. And then here on the west side they have Stanton Street on the side that goes to Irondale. Eventually the city has it in the plans to make it go through the mountain to go out to McKelligons Canyon so from west to north east, that's a great, fast connection. Things like that, and then they were going to have a monorail system going around the city and then buses were going to pick up people from wherever part of town they want to go. It will be good for visitors, you know like downtown where they are figuring out how to make the roundabout there and making traffic go smoother and easier. Then we have that ball park and pretty soon we might have that soccer field being where ASARCO was. The UTEP is trying to buy it but then lease it back I guess to them. That would be an excellent thing. Just have to make a system go there real quick off the freeway. So, looks promising, we're growing, you know they always say we're that slow city but we're growing pretty quick. You live here in El Paso? How are things in Austin? The only time our traffic is bad, is if there's a wreck and stuff and blocks everybody and it's hard to get around. And it looks like with these connections that they're doing out there it looks like it's going to be very nice. Just can't wait to have it finished and done. Just takes time. Once it's done, everyone will enjoy it.

Video Comment #4:

My name is Peter Svarzbein, I'm the City council representative for District 1, west side, most of the west side of El Paso, Texas. So, first of all, I really want to thank TxDOT for doing this these kind of open forum kind of meetings are really great, really encourages a lot of good dialog, a lot of participation from constituents and residents. So I really appreciate TxDOT for doing that. In terms of looking at I-10 and the future of it, I think that it's important to look at it not just necessarily for correcting some issues with traffic engineering but also unintended consequences that communities have had from interstate development. You know we can look at for example with Robert Moses and the Cross-Bronx Expressway and the unintended consequences of putting a major highway in the middle of an active and vibrant borough. You know, a lot of the issues the Bronx had in terms of the social disintegration issues of you know basically dislocation. A lot of it started with the Cross-Bronx Expressway when you kind of go through a community like that there's unintended consequences. So, I look at what's going on with I-10 and with this yes, there's issues of traffic capacity and engineering that we need to address and I think that TxDOT is being very proactive by looking at this but what are we going to do to try to correct and encourage different opportunities that aren't just necessarily strictly focusing on vehicular traffic into 2020 and beyond. So, some of the observations that I have first of all I look at alternative 4 with the adaptive lane in the middle, I think that is a very forward thinking, and very progressive and very necessary look at to enhance the operational abilities of what the interstate can do. Keep, obviously make sure, that there's flow for vehicular traffic but we really don't know with automation, with self-driving cars, with multi-modal mass transit opportunities, whether it be light rail or larger bus transit opportunities that those adaptive lanes could really be used to give people a genuine option for getting across our town.

One of the things that I-10 occurs in El Paso is that while it is one of the busiest east to west corridor on the interstate system in the United States, most of the traffic that is going on within the city limits is city traffic, yeah? So, its people getting from the east side to the west side to go to work, to go to school, to go visit friends, to go to lunch. It's... yes there's freight traffic, yes there's 18-wheelers, but the majority of traffic that is occurring within I-10 within our city limits, and probably within our county limits, are people just getting from one place to the other. And so what the adaptive lanes really give an opportunity is give people a genuine option where same I-10 the same way they would get from their house from George Dieter Drive to I-10 and the get over to the west side, they now have the opportunities with the adaptive lanes where an unknown technology or even just a bus rapid transit line or a dedicated line where rather than going to spend a 35 minute in that I can sit on another opportunity. And I think that alternative 4 really in a very aggressive and I think respectful way towards traditional vehicular traffic and also giving an opportunity, I think that one respects and encourages it. So I really think that there's a great opportunity for that. The other comment that I have relates towards probably the keystone aspect of the interstate in El Paso, and that is the downtown section from Porfirio Diaz to Cotton Street. There are overpasses that are probably way passed their allotted time. The city has invested a hundred million dollar, the state has, with the street car line. You have a tremendous amount of investment from the public and private sector within downtown and reality is that yes I-10 needs to be expanded, needs to be refortified, engineered better toward the standards we have now and not from the 1960's. But it would be remiss and I think it would be inappropriate to just factor in issues of traffic engineering for vehicular traffic and not take into account reality of the community and what their vision is for that corridor with downtown. There's hundreds of millions of dollars of investment from the private sector, from the public sector, I'm encouraging multimodal mass transit with the street car and the BRIO line. The cap top of an I-10 section should really really really be reflected and be responsive to what the communities needs and desires are on and so with looking at that area, one of the main things is that I-10 really really creates an island for downtown. It really just totally severs downtown from the rest of uptown, the area between I-10 and Schuster, even to the University and the medical center area. So that reality needs to be addressed, I think, with, correctively addressed with design opportunities towards that upper area. So how do you take into account that we need to connect those two areas. I encourage not just appropriate vehicular traffic flow but, multimodal traffic flow, non-vehicular traffic flow, whether it's from cyclists to pedestrians. You know one of the designs called for a downtown circulator route and it was very concerning. While it may have encouraged vehicular traffic flow, literally you were cutting off direct access points. You're creating more of an island and a separation of downtown proper from the rest, even with the street car connection in place. But more than that it really creates a giant barrier for any sort of safety for pedestrian that as currently design it would have six lanes of traffic that a pedestrian would have to cross through. And that's high-speed traffic, there's no street trees, there's no bulb-outs, there's nothing there to slow cards down to where they would be at a responsible speed with pedestrian and non-vehicular traffic. And so that design I think is kind of concerning. I think that there's ways that you can create that fabric you can stitch together, you can stitch back up uptown and downtown El Paso in a way that respects and honors the need for vehicular traffic. But not every street needs to go 60 miles per hour. You know, that's another, not every street needs to go 60 miles per hour. Because I've got the interstate right underneath it. When you are talking about graded streets and historic neighborhoods or in traditional neighborhood development, there's a different need and desire. And with the direction with what the city has shown through the private sector with numerous investments, from the Mills building, to the Plaza Theater, to the Plaza Hotel now, new development spreading up around the streetcar with public investment. With the streetcar line, with the San Jacinto Plaza, Southwest University Park, our great ballpark, you know there's a concentrated push to reactivate the downtown core to be an area that is not just a place of cultural pride but a great opportunity for economic redevelopment. To grow our personal tax and create an environment that allows us to retain and encourage are human capital to stay here, our educated work force to not have to choose to live in another area because they want to live in a different kind of environment than what you see on the exurbs. They want to be able to be in a place where they can walk, they can walk to where they work, they can walk to where they eat, they can be in a more urban environment. And so I think those desires should kind of be reflected and taken into consideration when looking on how to reimagine I-10, especially with that downtown corridor. And as a last one, a lot of the people that I've spoken to, that are stakeholders in downtown whether they are property owners or investors or even just more folks that are just going to art shows, one thing I hear about is the deck park. Is the need to go and stich those two areas and create more of an opportunity for social spaces within downtown and the uptown area. So

those are just some thoughts that I have. I think it's really great that TxDOT is here taking the time to offer that so thanks again for doing this.

Video Comment #5:

My name is Sito Negron. I am president of the Sunset Heights Neighbor Association. We've talked a lot about the values we have as an association, so I'm speaking on behalf of the association with the comments that are specific to the portions of the project affecting neighborhoods at least through the downtown. First of all, we understand how difficult it is to plan this kind of thing, you know get a lot of citizens, a lot of times the citizens are struggling to understand the volume of the information that you are presenting so it's very difficult to provide productive feedback. So we understand the challenges that you have sort of doing this. We have three access points to downtown, that's one of the hallmarks of that neighborhood and kind of the value that makes it a downtown neighborhood as well as kind of a suburban neighborhood that's connecting the university and those three are, well, Profirio Diaz, so I guess there are four kind of access points to the neighborhood, major access points, five is you count Schuster. But the walkable points are the Los Angeles Street underpass, and then Prospect Street overpass, and the Santa Fe overpass. Santa Fe is not as attractive because the sidewalks are narrow and there's a lot of traffic on there and it's also an access road [inaudible] and that just makes it not as attractive. What we've talked about as a neighborhood is making that corridor stronger for pedestrians and bike riders to go along with the other two corridors which are very accessible and very attractive for multiple uses. I personally drive my car, walk and bike on Los Angeles underpass and Prospect underpass and I know many people in my neighborhood who utilize all three of those modes depending on the need. I work downtown but I need my car for work so I drive to work and then I walk downtown for events or to enjoy amenities like the library or museum, or the neighborhood in and around the Civic Center. So it's a very important value for us to enhance the corridors, we don't want to lose Prospect so we are very much against Prospect Bridge being removed. We don't want to lose the Santa Fe Bridge, we want to enhance it. We want to enhance the corridor that goes underneath the freeway at Los Angeles with some landscaping and some lighting to make much more attractive for people to walk, bike, and even to drive through. So that's our major comments. Also, that's on behalf of the neighbor association. My personal comment, and this is something I am going to talk to the neighbor association about to get more folks to understand what's happening, is that redundancy in the context that our corridor is a very important thing. So there's very many access routes to downtown currently across the freeway because of all of the bridges. We realize that it's going to be a challenge to find the funding to replace those bridges as mandated by state, but we don't want to lose any of them. So we are very much, at least I am [inaudible] until the neighborhood associated gets involved, pretty sure there's not going to be much support for funneling all that traffic that's spread out into a couple of major roads, there's not going to be support for eminent domain to take buildings on either side of the freeway. We need to build up that fabric and not replace it with large scale infrastructure. The value of El Paso, the core of it was built using a very beautiful plan and that plan has been affirmed by the City, and it's [inaudible] within the 2012 City Plan and it has a lot of discussion, in fact it even quotes, the smallest beautiful very important book, it quotes Jane Jacobs throughout, and those values are for small grain multiple uses that provide and create value by synergy created by all these small uses. So, it doesn't seem to be in line with the values expressed by the City in its planning documents, both in the 2025 plan and the 2012 plan, to eliminate these small redundancies that provide local access. That's the bigger comment, and of course for the neighborhood specifically, we want to maintain all of those access points and build upon them, and not lose any of them.

SEGMENT 3: 3/13/2018 El Paso Multipurpose Recreation Center

Video Comment #6:

My name is Sergio Flores and I'm here at the, for the video comment on all this information of the extension of I-10. I live in the third section on Tejas 5900, Tejas close to Casa. I remember when the freeway was going through here, you know, it was wonderful back then, but you know, now it's a nightmare. And that's, I normally don't get involved in anything. I

just figure well they're going to do what they're going to do, but I figure you know what that's enough thinking like that. It's time to get involved. So that's why I'm here. I seem to like everything the way that you guys have it, put the comments and broken it up in sections and you have some fine people here that are very knowledgeable about everything that's going on. My biggest concern is that nothing's going to happen 'til the year 42. You know, that is a long 20 years away. And I figure, well I guess you got to get an early start with that stuff cause it takes time, from planning and understanding also. But if it takes that long I think that the problem is that a lot of people start speculating. I know around where I live everybody is like "oh they are going to knock the houses down and they are going to make you move away" and you know from what little bits and pieces that they've seen from other things they, you know the sky is falling, the sky is falling and I get here and there's nothing like that. We're just in the preliminaries and taking feedback and everything like that. My main concern is the west side is just about done with all their nightmares over there and are in for more nightmares? So that's basically all I have to say, just curious about all those things, about the surveys, the comments and all that feedback and that stuff.

Video Comment #7:

Leonor Wilson and I just walked through your section of explaining all the new changes which I think are really great and much needed. The infrastructure is very old. Sometimes we as citizens believe it's very painful because we are inconvenienced but progress is always good. So I think taking into consideration HOV lanes, putting semis with buses is great, fantastic actually. That puts them in a lane they would appreciate and we as drivers would appreciate. Having clear communication to us it's obviously good. I love the Go-10, then we know what's going at any time, giving us warning when closures are about to happen. So I think this is all good for us, you know cause we are growing.

Reimagine I-10 Planning Study

El Paso District

May 2018

The environmental review, consultation, and other actions required by applicable Federal environmental laws for this project are being, or have been, carried-out by TxDOT pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated December 16, 2014, and executed by FHWA and TxDOT.

Introduction

TxDOT El Paso District conducted an online engagement survey as part of an overall public involvement strategy in its advanced planning study for the I-10 Corridor from the New Mexico/Texas state line to Tornillo. The purpose of the study is to analyse and evaluate the current and future transportation needs for the I-10 El Paso corridor. The study is called Reimagine I-10 to emphasize the need to reimagine how the corridor operates today and develop unique solutions for the El Paso area.

With five US and Mexico ports of entry in the study limits and with the use of I-10 as a major east/west freight corridor, the importance of this corridor is far-reaching. Furthermore, El Paso is experiencing significant growth and development, but because of its unique geographical location El Paso is limited to any alternative routing options, which ultimately puts more demand on I-10.

The study area spans 55 miles, from the border of Texas and New Mexico to Tornillo. It includes more than 200 bridge structures. For study purposes, the corridor has been segmented into four areas to identify unique issues specific to each segment: Northern Gateway, Downtown El Paso, Airport, Southern Gateway. The Reimagine I-10 feasibility study consists of three layers of study for improvement: operational, corridor-wide and technological. Within each layer, solutions such as ramp consolidation, additional capacity and truck platooning will be considered.

Throughout the study, TxDOT offers various opportunities for the public to get involved, including stakeholder workshops, event kiosks, open house meetings, online meetings and online engagement.

Online Engagement

An online engagement tool, MetroQuest, was developed for the Reimagine I-10 feasibility study. The English site and the Spanish site each was composed of five screens: Welcome, Priorities, Opportunities, In Your Words, and Stay Involved. The link was posted on txdot.gov from Feb. 22, 2018 through April 3, 2018. This report presents the outreach strategies and details the data results.

Logistics and Outreach

The survey was available from Feb. 22, 2018 through April 3, 2018 online at txdot.gov, keywords “Reimagine I-10.” It took approximately 5 to 7 minutes to complete and was available online 24/7.

The survey was advertised via the following methods:

- **Open House** – A series of open houses was hosted by TxDOT on Tuesday, March 6, 2018 at El Paso Community College Northwest Campus (6701 S. Desert Blvd., El Paso, 79932), Wednesday, March 7, 2018, at Mesita Elementary School Gymnasium (3307 N. Staton St., El Paso, 79902), Tuesday, March 13, 2018 at El Paso Multipurpose Recreation Center (9031 Viscount Blvd., El Paso, 79925) and on Wednesday, March 14, 2018 at Fabens High School Gymnasium (601 NE Ave. G, Fabens, 79838). Approximately 24 Non-TxDOT/Non-consultant members of the public attended the March 6 meeting; approximately 28 attended the March 7 meeting; four attended the March 13 meeting; and eight attended the March 14 meeting. A station with explanation meeting display board and a staff member were part of the open house, where members of the public could use laptops available to complete the survey.
- Post cards and meeting informational flyers included a QR code for the Reimagine I-10 project page, where the online survey “lived.”
- The txdot.gov Hearings and Meetings Schedule carried all four of the Reimagine I-10 meetings and each posting included a link to the project page.
- An email notification for the meeting that included a link to the project page was sent to a list of 208 recipients on Feb. 26, 2018. Ninety-eight percent of the emails were delivered with an 18 percent open rate.
- **Local government:** Letters were mailed to local elected officials informing them of the upcoming series of public meetings and the opportunity to complete the online survey.
- **Traditional and social media:** The public information officers broadcast the online survey opportunity through news releases, TV and radio interviews, email and Twitter.
- **Outreach event:** Flyers that included the QR code for the survey were distributed at public meetings for other corridor studies and other meetings.

TxDOT staff assists with online survey

Meeting display board

Survey Summary

Sixty-nine participants weighed in on their vision for Reimagine I-10, English and two completed the Spanish survey. Numbers completing the English survey peaked on March 7 with 16. An additional 85 opened the English survey link and 14 opened the Spanish survey link, but never progressed to the next screen.

Most of the participants (12) reported their zip code as 79912, with six reporting their zip code as 79902; four reported zip code of 79936; three reported zip code of 79907, 79938 and 79838; two reporting zip codes of 79911, 79922, 79928, 79935; and one each reported zip codes of 76856, 79836, 79849, 79904, 79905, 79924, 79925, 79927, 79930 and 79932. Nine of the participants heard about the survey through media; seven through their local government; 20 from an outreach event; 13 from the website; and three from a friend. Of those completing the survey, 41 use the corridor to get to work; 40 use it frequently; 23 use it occasionally for long-term trips and one uses it for freight movement.

Table: Uses of Horizon Boulevard

	Use	Number
Reimagine I-10	To get to work	41
	Frequently	40
	Occasionally for long-term trips	23
	Freight movement	1

Summary of Findings

- Mobility and circulation is the top priority for this study, according to participants, with design second.
- In the five priority areas, here are highest rated issues: Mobility and circulation (traffic congestion); multimodal (tie for special purpose lanes and transit service); design (ramp interchange); value (economic development); environmental (response to impacts); and technology (mobility and circulation).
- “Daily,” “traffic,” and “congestion” and “commuter” were commonly used words in the general comments

Screen 2: Priority Ranking

The Priority Ranking screen asked participants to order the top three priority issues to consider when developing potential improvements for Reimagine I-10. The six priorities are:

- Technology: I want the study team to consider advancing technologies to address corridor issues.
- Mobility and circulation: I want the study team to focus on facilitating movement through and within the corridor.
- Multimodal: I want the study team to offer innovative transportation alternatives.
- Value: I want the study team to focus on improvements that are sustainable and balanced with respect to costs and benefits.
- Environmental: I want the design to minimize environmental impacts to the human and natural environment.
- Design: I want the study team to focus on providing a desirable ride quality, safely.

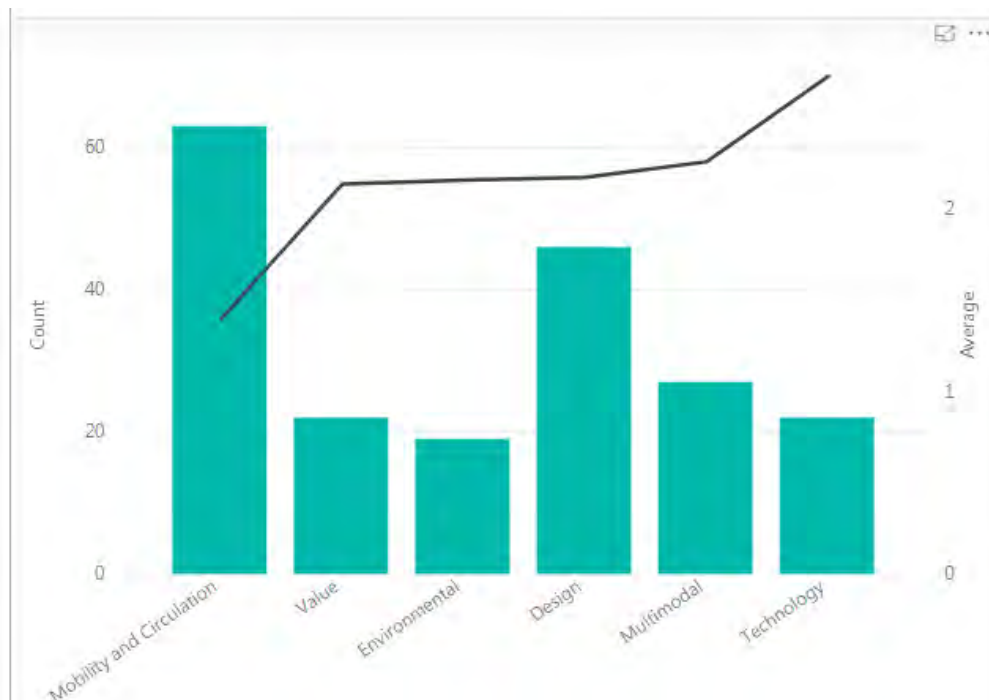

Participants in the survey said mobility and circulation is their top priority, with design second and value third.

The table below shows each ranking item, showing how often each item was ranked in each position, ordered by average. Note that 1 is the highest rank.

Mobility and Circulation 44 (70%) 1 13 (21%) 2 6 (10%) 3 Times ranked: 63 Average rank: 1.397 <td> Value 6 (27%) 1 7 (32%) 2 9 (41%) 3 Times ranked: 22 Average rank: 2.136 <td> Environmental 5 (26%) 1 6 (32%) 2 8 (42%) 3 Times ranked: 19 Average rank: 2.158 <td> Design 7 (15%) 1 24 (52%) 2 15 (33%) 3 Times ranked: 46 Average rank: 2.174 </td></td></td>	Value 6 (27%) 1 7 (32%) 2 9 (41%) 3 Times ranked: 22 Average rank: 2.136 <td> Environmental 5 (26%) 1 6 (32%) 2 8 (42%) 3 Times ranked: 19 Average rank: 2.158 <td> Design 7 (15%) 1 24 (52%) 2 15 (33%) 3 Times ranked: 46 Average rank: 2.174 </td></td>	Environmental 5 (26%) 1 6 (32%) 2 8 (42%) 3 Times ranked: 19 Average rank: 2.158 <td> Design 7 (15%) 1 24 (52%) 2 15 (33%) 3 Times ranked: 46 Average rank: 2.174 </td>	Design 7 (15%) 1 24 (52%) 2 15 (33%) 3 Times ranked: 46 Average rank: 2.174
Multimodal 5 (19%) 1 10 (37%) 2 12 (44%) 3 Times ranked: 27 Average rank: 2.259 <td> Technology (0%) 1 6 (27%) 2 16 (73%) 3 Times ranked: 22 Average rank: 2.727 </td>	Technology (0%) 1 6 (27%) 2 16 (73%) 3 Times ranked: 22 Average rank: 2.727		

The table below shows all rankings, with Mobility and Circulation first, Design second and Multimodal third. Because the highest ranking is 1, small rankings and averages are better than high ones.

Environmental Comments:

- “The Sunset Heights historic district is a special and important part of El Paso's heritage. All care must be given to preserve and enhance this area.”
- “Please reduce noise & visual impact adjacent to UTEP and Sunset Heights and Old San Francisco historic districts.”
- “Don't care”
- “Environmental considerations should be paramount for all of us in the 21st century. This should include considerations of the flood impact of construction projects during a major rain event, which will increase over time.”
- “Any improvements to help the environment are welcome.”
-

Multimodal comments:

- “It's a little last century to be married to single vehicle travel as we are here in Texas. Things have got to change. We cannot sustain more and more vehicles on roadways with an increasing population. I'd like to look at what other states/cities/countries are doing to solve congestion problems.”
- “Design with consideration to increase use of electric vehicles.”

Mobility and Circulation comments:

- “For many miles, I-10 has only two exits (Resler and Sunland Park). I would like this to change as in case of an accident, vehicles are left with no option but to be stuck.”
- “New Mexico expanded I-10 to three lanes in both directions from Las Cruces to the NM/TX state line years ago and Texas did not, ? That would help tremendously with traffic flow from Anthony Tx to North Mesa!”
- “Problem areas in need of improvements: Sunland Park, Artcraft, Geronimo, I- 54”

Value

- “Project ideas look very promising... would love to see some of these ideas implemented”

Design

- “Increase native plant landscaping and consider permaculture principles in design to reduce landscape O&M.”

Technology

- “I was just wonder would technology would be build for driver less truck and possible charge station for electrical cars as people are driving.”
- “How about sending an alert 5 exits before a closure to reroute?”

Suggest Another Item for Future Consideration:

- “Safety”
- “Time for completion.”

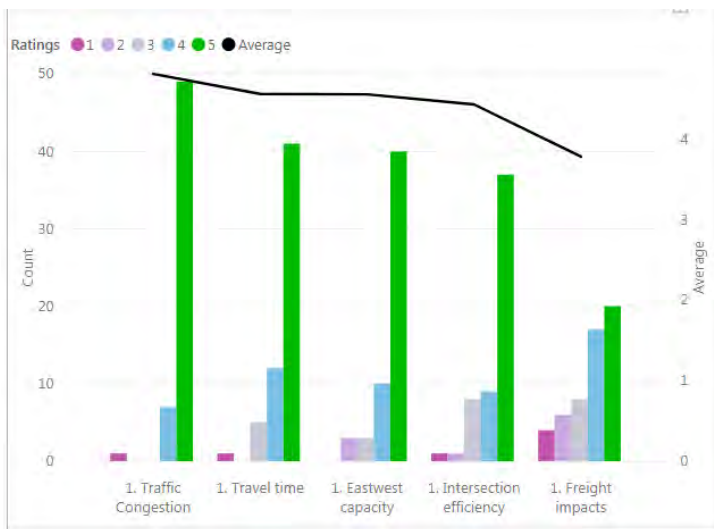

Screen 3: Opportunities

The third screen of the online survey asked for more information about the priority areas selected on Screen 2. Participants were asked to rate each strategy (of the five priority areas: Mobility and Circulation, Environmental, Multimodal, Design and Value) between 1 star (least important) and 5 stars (most important) on how effective it would be in creating the ideal community.

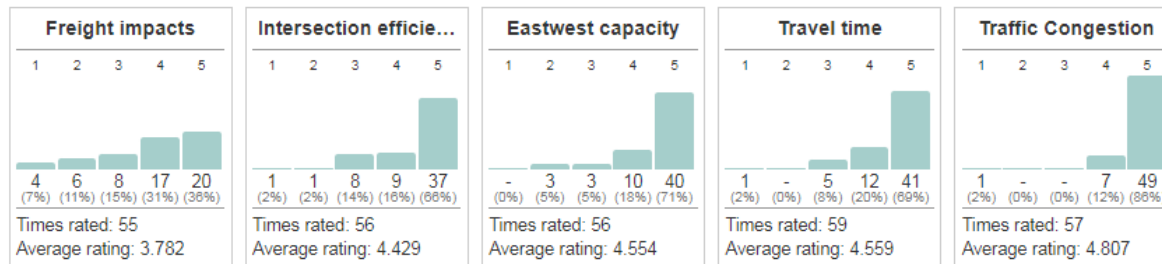

- Mobility and Circulation: Facilitate movement through and within the corridor.
- Multimodal: Offer innovative transportation alternatives.
- Technology: Consider advancing technologies to address corridor issues.
- Value: Ensure that improvements are sustainable and balanced with respect to costs and benefits.
- Design: Comply with accepted design standards to provide a safer facility with desirable ride quality.
- Environmental: Design to minimize environmental impacts to the human and natural environment.

Below are the graphs showing the strategy rating of each of the priority areas.

Mobility and Circulation

Mobility and Circulation

Traffic Congestion Comments:

- “Congestion occurs at the "spaghetti bowl" because of the "S" design along with the merging traffic from the exits a solution they would really help”
- “More lanes may not be the answer. What about proposing people take the bus or ride a train along I-10”
- “Might want to install an HOV (high-occupancy vehicle) lane for more traffic fluidity.”
- “Lots of the ideas seem great but just imagining the construction time investment on such gives me a headache. The less impact on the traffic throughout construction, the better.”

Travel Time Comments:

- “State should look for other ways to encourage people not to drive, and take alternative transportation means.”
- “Loop 375 already has a 65mph speed limit increasing I-10 would be great for non-rush hour times”

Intersection Efficiency Comments:

- “Dealing with congestion on the freeway is understandable but having to wait through multiple light cycles after the exit is a headache.”

Eastwest Capacity Comments:

- “Alternative methods of transportation should be considered along corridor. Fast BRIO or SunMetro buses or trains along I-10”
- “To make sure to build ahead of the curve of the population as the area that El Paso would grow more in the future.”
- “Might want to install higher CTB (concrete traffic barrier) between main lanes due to accident backup”

Freight Impacts Comments:

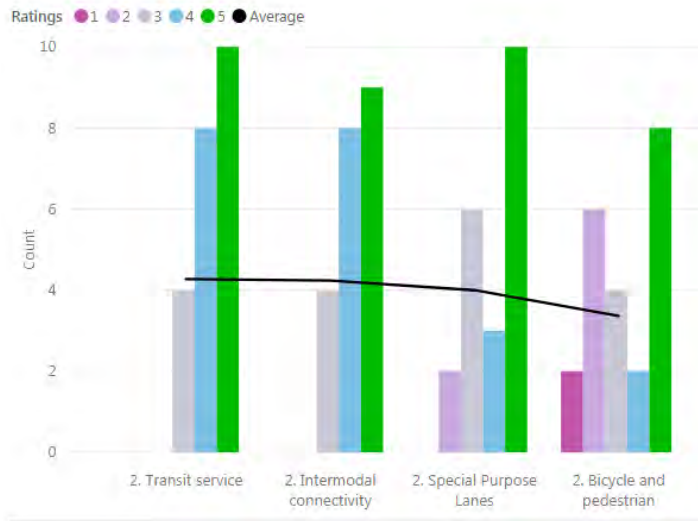

- “Please build the Anthony Gap, and make the Trailers go outside of the El Paso City Limits”
- “I seriously believe that Texas and New Mexico should consider a partnership to construct an outer loop from New Mexico 404 through Chapparral out and through Ft. Bliss, Far East El Paso county to connect at either Fabens or Tornillo Tx. This would alleviate heavy truck traffic from having to pass through The El Paso area if that commercial traffic is not doing business, i.e., making deliveries or picking up freight in the area, therefore less truck traffic, less congestion.”

- “Informing drivers of the loop 375 drivers (once the project is completed) would be a great way of getting them off the I-10 and the city traffic. Of course this would only apply to truck driver going through the city, not delivering within.”

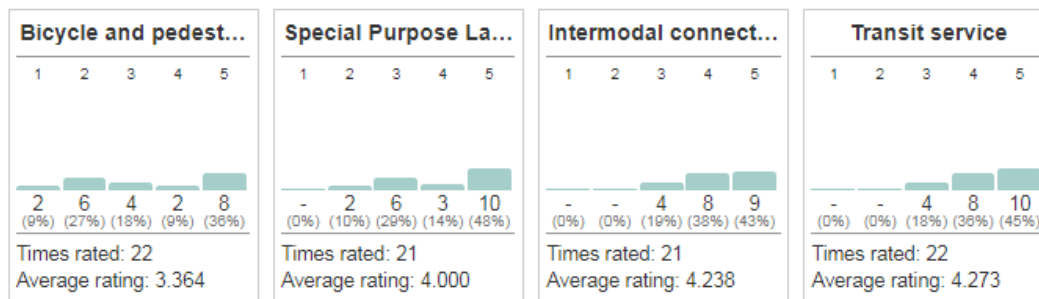

Mobility and Circulation Comment:

- “More exits on I-10”

Multimodal

Multimodal

Transit Service

Comment:

- “Making transit more predictable and very close to designated arrival times make transit more palatable”

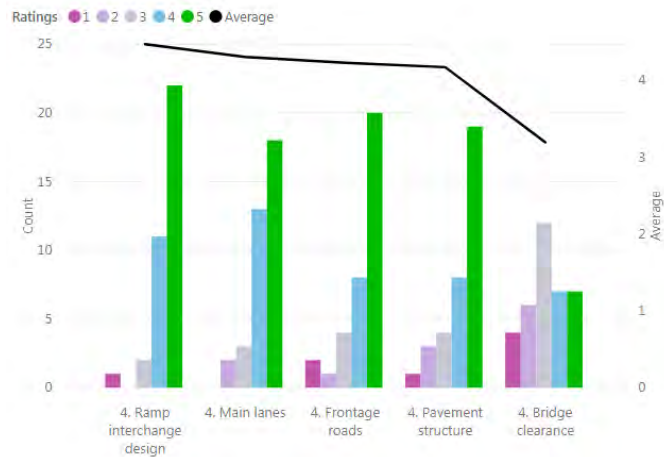

Bicycle and Pedestrian Comment:

- “Bicycle lanes are good, however frontage roads are usually fast traffic oriented making it hazardous for bicycles, bike lanes should be on city streets to allow for safe passage from home to street to destination.”

Special Purpose Lanes Comment:

- “The ability to see buses zooming by on dedicated lanes while your stuck in traffic will increase the amount of riders, be better for the environment, and solve circulation issues with more people taking mass transit.”

Design

Design

Bridge

Clearance Comment:

- “Horizon going towards horizon city with no doubt needs a bridge (like the Montwood area) that will minimize the traffic exit.”

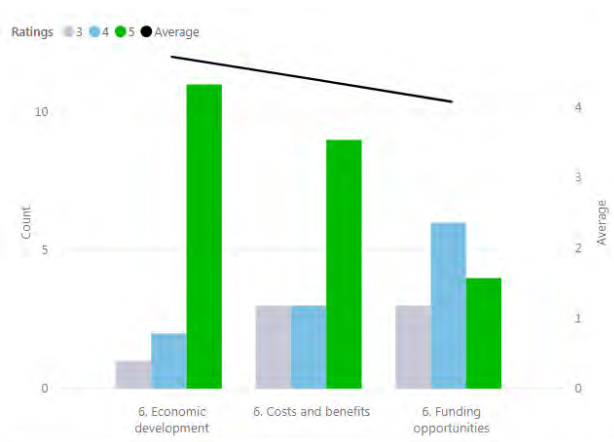

Frontage Roads Comment:

- “More way to get on and off 1-10 on the West side.”

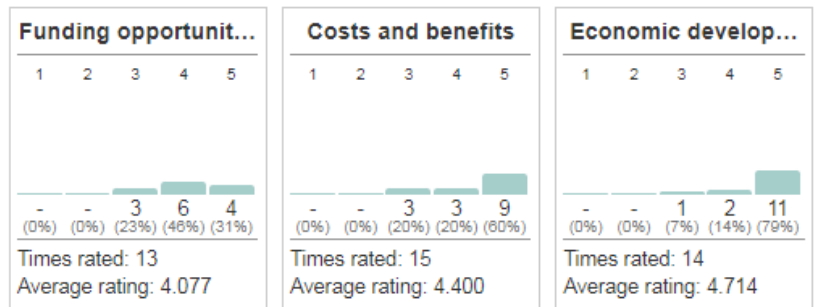

Pavement Structure Comment:

- “I travel to Mount Rushmore and Yellowstone and nine states last summer. Texas has the best highway.”

Value

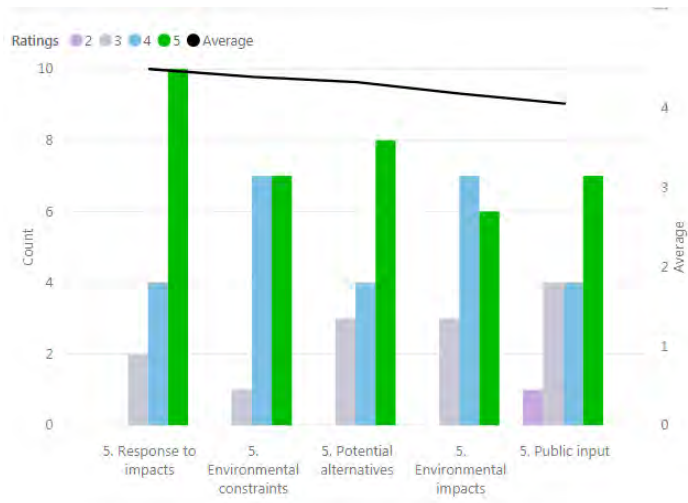

Value

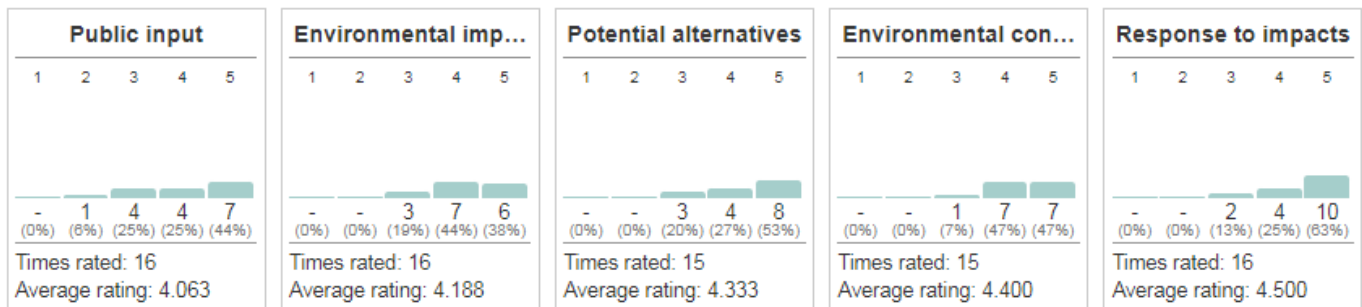

Costs and Benefits, Economic Development Comments:

- “Lots of ideas seem great, yet at the end of the day money is always one of the biggest factors. Living in a small low-income community like Fabens cost is a great concern for the tax payers in the areas of Fabens and Tornillo.”
- “The service roads in sector 4 are a good idea, yet there really isn't many business growth along the highway area after horizon. My concern is if the investment would really be necessary for the area.”

Environmental

Environmental

Environmental Constraints Comment:

- "Conservation of the environment needs to be heavily considered."

Potential Alternative Comment:

- "Find some way to get so many semis off the freeway (use trains more)"

Environmental Impact Comments:

- "Less idling time in traffic, better flow, get to destination quicker"
- "More development, means more cars, and more runoff that needs to be filtered from contamination."

Response To Impacts Comments:

- "NEPA process has to take its course as mandated by law."
- "Design to reduce operational impacts and increase sustainability."

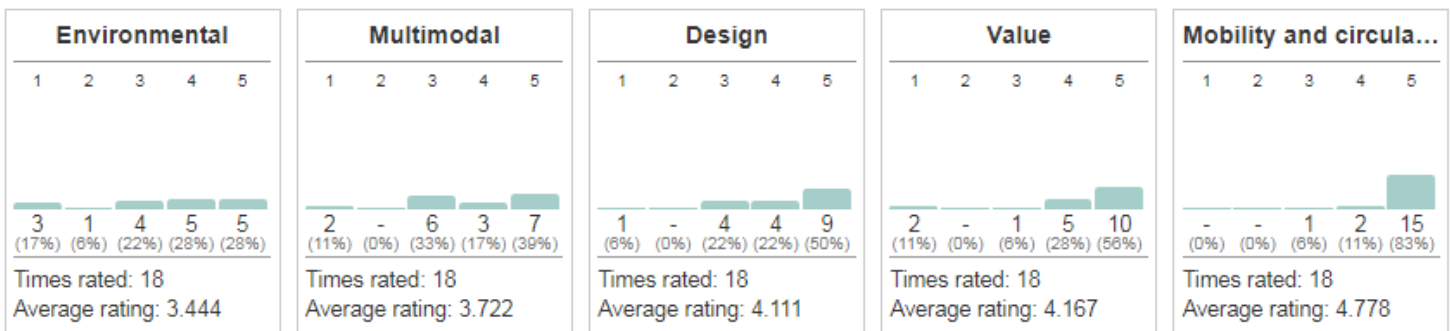

Public Input Comment:

- "Green designs, and new technology should be applied to conserve the environment."

Technology

Technology

Screen 4: In Your Words

The fourth screen of the online survey asked for visioning for the corridor by the public. Screen request, “In your own words, describe how you currently use I-10 (daily commuter, occasional use, etc.). Please feel free to also include your priorities, concerns and vision for the corridor.”

Thirty-eight comments were received:

- “Daily commuter and intermittent weekend use for cross town travel. Seeking better operational integration with adjacent land uses particularly historic and residential, and increases to sustainable O&M throughout.”
- “I use I-10 daily, I feel the real reason I-10 is congested is due the fact that El Paso's current system of transportation does not allow you to get from one side of town to another on multiple streets, there's Montana, loop 375 and I-10 if you need to get to downtown and only loop 375 and I-10 if you need to get to the westside or northeast. Cities like phoenix have multiple highways to get you to the same location, and also due to the grid like function of city streets you are able to get from one place to another lots of different ways, causing less reliance on the highways therefore causing less congestion. We need to coordinate with the local government to improve connectivity throughout the whole city and increase the amount of ways to get from one side of El Paso to the other”
- “I am a daily commuter. I love the improvements that have been made. I live in Sunset Heights and am upset that our entrance to the i-10 was taken away, causing many people to take a "shortcut" onto the off ramp for UTEP. Please bring that back and do not cut us off or make us go to a whole bunch of lights to get to the i-10. We bought the house here because of the ease we had to get onto the 10, and now, going west, we have to deal with the UTEP traffic and lights. I hope you can find a way to ease the congestion, because after 5pm, it is difficult to go west, though not impossible. Having the entrance to Paisano helps. “
- “I commute on I-10 everyday. My concern is improving traffic congestion”
- “I use very occasionally but how IH-10 is improved is important to connecting West Texas with the rest of the country. We must keep up with mobility before El Paso becomes another Houston, albeit one with no alternatives available.”
- “Daily commuter. My suggestion is to transfer all freight trucks traffic to an alternate route.”
- “I am a lifetime El Pasoan and a Profesional CDL driver. I know the challenges drivers face every day on I10. I'm sure that with the completion of the go-10 and loop 375 projects the traffic flow will benefit from the extra lanes but, with the continued growth in business and housing on the west side, the demand on I-10 will continue to grow. With the expected industry growth in nearby Santa Teresa New Mexico this will only place a

- bigger challenge especially in the commercial truck traffic. Even with the proposed I10 improvements from Anthony Tx to Tornillo Tx, traffic congestion will still be heavy during peak times. I hope that the states of New Mexico and Texas, along with the Feds, Ft. Bliss would get involved in a partnership and seriously consider constructing an outer loop for travelers and heavy truck traffic not doing business in the El Paso area to bypass the region. This I strongly believe would help ease the traffic congestion along the I10 corridor from west El Paso to the far east side of El Paso.”
- ” Occasionally. Main thing to be done is figure out a way to remediate accidents more efficiently. Make some way for people to get onto the access roads when there is an accident-cross the median in an organized manner??”
 - “Work commute to meetings”
 - “I use I-10 for daily commuting to my jobs from west El Paso to the downtown area. My main concern is the availability of exiting or navigating around problem areas.”
 - “I am a daily commuter between Arcraft rd and George Dieter Dr.
 - o 1. Free flow of traffic from entrance to exit.
 - o 2. dependable. pothole free road surfaces that do not excessively chew up tires.”
 - “Occasional user”
 - “Daily”
 - “I would like to see less bottleneck traffic!”
 - “Almost daily, we need a better design for the I-10 entrance lines, since those create a chaos. Also do the job faster, we can only see small crews working and some places we don't see crews at all for weeks or months, is much better spend more hiring more crews than affecting businesses, companies and people due to traffic jam and congestion plus environment pollution.”
 - “I use I-10 daily to commute to my office and to meet clients. I sell Real Estate, so my work takes me to all parts of the county.”
 - “Daily commute. Address congestion, improved lane capacity and alignment design, more connectors, improved ramp access, and improved interchanges that will serve the community present and future demands due to expansion and traffic demands.”
 - “Currently commuter use on semi-daily basis on west side of town. I believe removal of Porfirio Diaz on and off ramps will increase pressure on use of Schuster significantly in a negative way. As an alternative, I would support overhead frontage in preference to buying out residents along the side of Porfirio to create ample room for the expanded lanes on I-10 at this location; alternatively, accommodating a slightly compressed lane-age in this area would be something worth considering. For the Yandell Downtown concepts, I feel like any of the concepts would be an improvement, in spite of the need to buy out current owners. To my memory, those lots are not adding great value to the

- neighborhood, but well-maintained historic properties should be respected. I'm unsure which Concept I prefer. I am more attracted to the loop Concept. As for the Alternatives for easing traffic, I do not support the concrete barriers of Alternative 4—too dangerous. We should definitely avoid any alternative that features a disadvantage of increased crashes. Any of the other 3 would seem preferable.”
- “I use I-10 on a daily basis to get to work. I would consider alternative ways to transport myself if the City provided better and faster public transportation services. The State should consider that building more lanes and making the highway wider and bigger may not be the answer. Buying bigger belts everytime your old belt does not fit may mean it is time for a healthy diet.”
 - “Daily commuter”
 - “I drive to work on 1-10 and 1-54 everyday. I make sure that enough space for a safe drive and plenty of place to get off so that your not sit on the freeway. I would like to see more connection from the West side to get on the 1-10.”
 - “I use I-10 to get to shopping, travel, recreational. Vision includes finding ways to make the city more multimodal.”
 - “I-10 is so important that improvements need to be designed and implemented even if they are expensive. Think big!”
 - “I would like to see capacity improvements in the east side from Hawkins to U.S. 54. I would also like connectivity from I-10 to loop 375 east bound around US 54. Finally, public transit improvements throughout freeway.”
 - “During rush hour designate a carpool lane, and also very important address the issue of vehicles traveling into Mexico blocking lanes on I-10 off ramp.”
 - “I am a daily commuter on I-10. I drive throughout El Pas but concentrated more on the East side. Main priority is the congestion that seems to have gotten worse the last few years. Shoulders are narrow or almost non existent. With the traffic from Mexico, alternative lanes should be considered. HOV for example. Re-position ramps so that they do not cause additional congestion on access roads. Its hard when those are just as backed up as I-10 is.”
 - “Getting trucks thru El Paso is a must, more lanes the better. Have presenters have good understanding of our town. They are not familiar with the area, east side vs west side, street names, north east etc.”
 - “I am a daily commuter and spend an average of an hour daily on the I-10 corridor. Commute time is always a concern and i am always for innovative ways to improve commute time and ease traffic congestion. I would like to also add as an idea to improve lane capacity during peak hours, if ROW is a constraint, is to apply adaptive lane configuration using zipper barrier. Over all great job on the progress!”

- “When looking at the different segments planned put for 2042 I believe that although it is important to create a highway with better flow and efficiency it is also to take into account the impact during this construction.”
- “I'm an I10 weekend commuter; however I would like to see I10 safer for our community and through travelers.”
- “Use I-10 every day to commute from home to work. Priorities are safety and time. Better planned roads ease the long commutes in different ways.”
- “Make the downtown area (Sunland-Airway) wider. After that, reduce the amount of exits from Airway-Eastlake. Traffic after that is pretty good. But a little extra help to the people going to horizon city (west bound) would be great. Thus, creating a bridge (like the Montwood and loop 375 area) would be a great help for those trying to get in and out of the city. I find the extension of the service roads on the Fabens and Tornillo area unnecessary as of today, these are still towns with no major traffic impact.”
- “As a recently retired sales representative, I feel Tex Dot greatly improved our interstate and connecting roads during the years I worked. My use now is for pleasure but I feel we need to improve our infrastructure and roads for El Paso to stay competitive with other cities and draw better paying jobs here.”
- “Daily use”
- “I'd like to spend less time in traffic period. I believe our city should have relief routes for cargo that pass thru the city like in larger cities across the city. I believe that would relieve a lot of the traffic problems we face.”
- “I'm a daily commuter on I-10. I predominantly use segment 3 and 4. I would like to see more safety lighting in segment 4. Added lanes between FM 1281 and FM 1110 is going to be needed soon. Also I think a concrete barrier would be great corridor wide.”
- “Capping the freeway, especially in the downtown area should be considered. We want a unique, inviting downtown that respects our historic neighborhoods and plays to El Paso's unique features. The Sunset Heights area has already suffered greatly when I-10 was built right through it - it would be nice to fix those eyesores created by the original I-10 design.”

I-10 El Paso Corridor Study

GOALS & OBJECTIVES

MOBILITY & CIRCULATION

Goal: Facilitate movement through and within the corridor

Objectives

- ✓ Improve management of traffic congestion
- ✓ Improve travel time
- ✓ Improve intersection efficiency
- ✓ Enhance east-west capacity
- ✓ Minimize disruption to traffic during construction
- ✓ Evaluate freight impacts and needs

ENVIRONMENTAL

Goal: Design to minimize Environmental Impacts to the Human and Natural Environment

Objectives

- ✓ Identify Study Area
- ✓ Identify Environmental Constraints
- ✓ Identify Potential Alternatives
- ✓ Assess Potential Environmental Impacts
- ✓ Minimize/Avoid Environmental Impacts
- ✓ Evaluate/ Incorporate input from public and stakeholders

MULTIMODAL

Goal: Offer innovative transportation alternatives

Objectives

- ✓ Consider adaptive, special purpose lanes
- ✓ Improve transit service
- ✓ Improve bicycle and pedestrian facilities
- ✓ Facilitate intermodal connectivity and access for goods transport

DESIGN

Goal: Comply with accepted design standards to provide a safer facility with desirable ride quality

Objectives

- ✓ Improve main lane horizontal and vertical deficiencies
- ✓ Address bridge clearance issues
- ✓ Improve ramp and interchange design
- ✓ Address frontage road drainage issues
- ✓ Improve pavement structural integrity

VALUE

Goal: Ensure that improvements are sustainable and balanced with respect to costs and benefits

Objectives

- ✓ Balance costs, benefits and impacts
- ✓ Support regional economic development goals
- ✓ Create funding opportunities from public and private partnerships

TECHNOLOGY

Goal: Leverage advancing technologies to address corridor issues.

Objectives

- ✓ Apply Technology
Goal to:
 - Mobility & Circulation
 - Environmental
 - Multimodal
 - Design
 - Value

LOCATION OF OUTREACH EVENTS

Tuesday, March 6, 2018
from 5 to 7 p.m.

El Paso Community College
Northwest Campus
6701 S Desert Blvd.
El Paso, TX 79932

Wednesday, March 7,
2018 from 5 to 7 p.m.

Mesita Elementary School,
Gymnasium
3307 N Stanton St.
El Paso, TX 79902

Tuesday, March 13,
2018 from 5 to 7 p.m.

El Paso Multipurpose
Recreation Center 9031
Viscount Blvd
El Paso, TX 79925

Wednesday, March 14,
2018 from 5 to 7 p.m.

Fabens High School,
Gymnasium
601 NE Ave G
Fabens, TX 79838

THANK YOU

YOUR PARTICIPATION IS VALUED & APPRECIATED

The events will be conducted in English. If English is not your primary language and you have difficulty communicating effectively in English, Spanish-language interpretation will be provided. If you have a disability and need assistance, special arrangements can be made to accommodate most needs. If you require accommodation to attend the events, please contact TxDOT El Paso District Public Information Officer, Jennifer Wright, at (915) 790-4200 at least two days before the scheduled event. If you have any questions or would like to discuss the project in more detail, please contact Hugo Hernandez, TxDOT Project Manager, at (915) 790-4200 or Hugo.Hernandez@txdot.gov.

OUTREACH EVENTS

Tuesday, March 6
from 5 to 7pm

Wednesday, March 7
from 5 to 7pm

Tuesday, March 13
from 5 to 7 pm

Wednesday, March 14
from 5 to 7pm

REIMAGINE I-10

WHY REIMAGINE I-10?

truck platooning will be considered. As we move into the alternative development phase we are exploring solutions that meet our study goals. Refer to the map, on the next page, to see the No-Build and Build scenarios.

With five U.S./Mexico ports of entry and the use of I-10 as a major east/west freight corridor, the Reimagine I-10 Study from NM State Line to FM 3380 (Aguilera International Highway) is extremely important not only for El Paso but for all the surrounding areas. El Paso is experiencing significant growth and development but its unique geographical location limits alternative routing options, which ultimately puts more demand on I-10.

The study is currently proposing three layers for improvement: operational, corridor wide, and technology. Within each layer, solutions such as ramp consolidation, additional capacity, and

PROJECT GOALS

MOBILITY & CIRCULATION

Facilitate movement through and within the corridor

ENVIRONMENTAL

Design to minimize Environmental Impacts to the Human and Natural Environment

MULTIMODAL

Offer innovative transportation alternatives

DESIGN

Comply with accepted design standards to provide a safer facility with desirable ride quality

VALUE

Ensure that improvements are sustainable and balanced with respect to costs and benefits

TECHNOLOGY

Leverage advancing technologies to address corridor issues

Projected Level of Service Map for Year 2042

NO BUILD 2042 PEAK PERIOD*

The No Build scenario implies that there will be no additional improvements along the corridor other than the current projects in construction.

*P.M. Peak Period hours

LEVEL OF SERVICE (LOS)

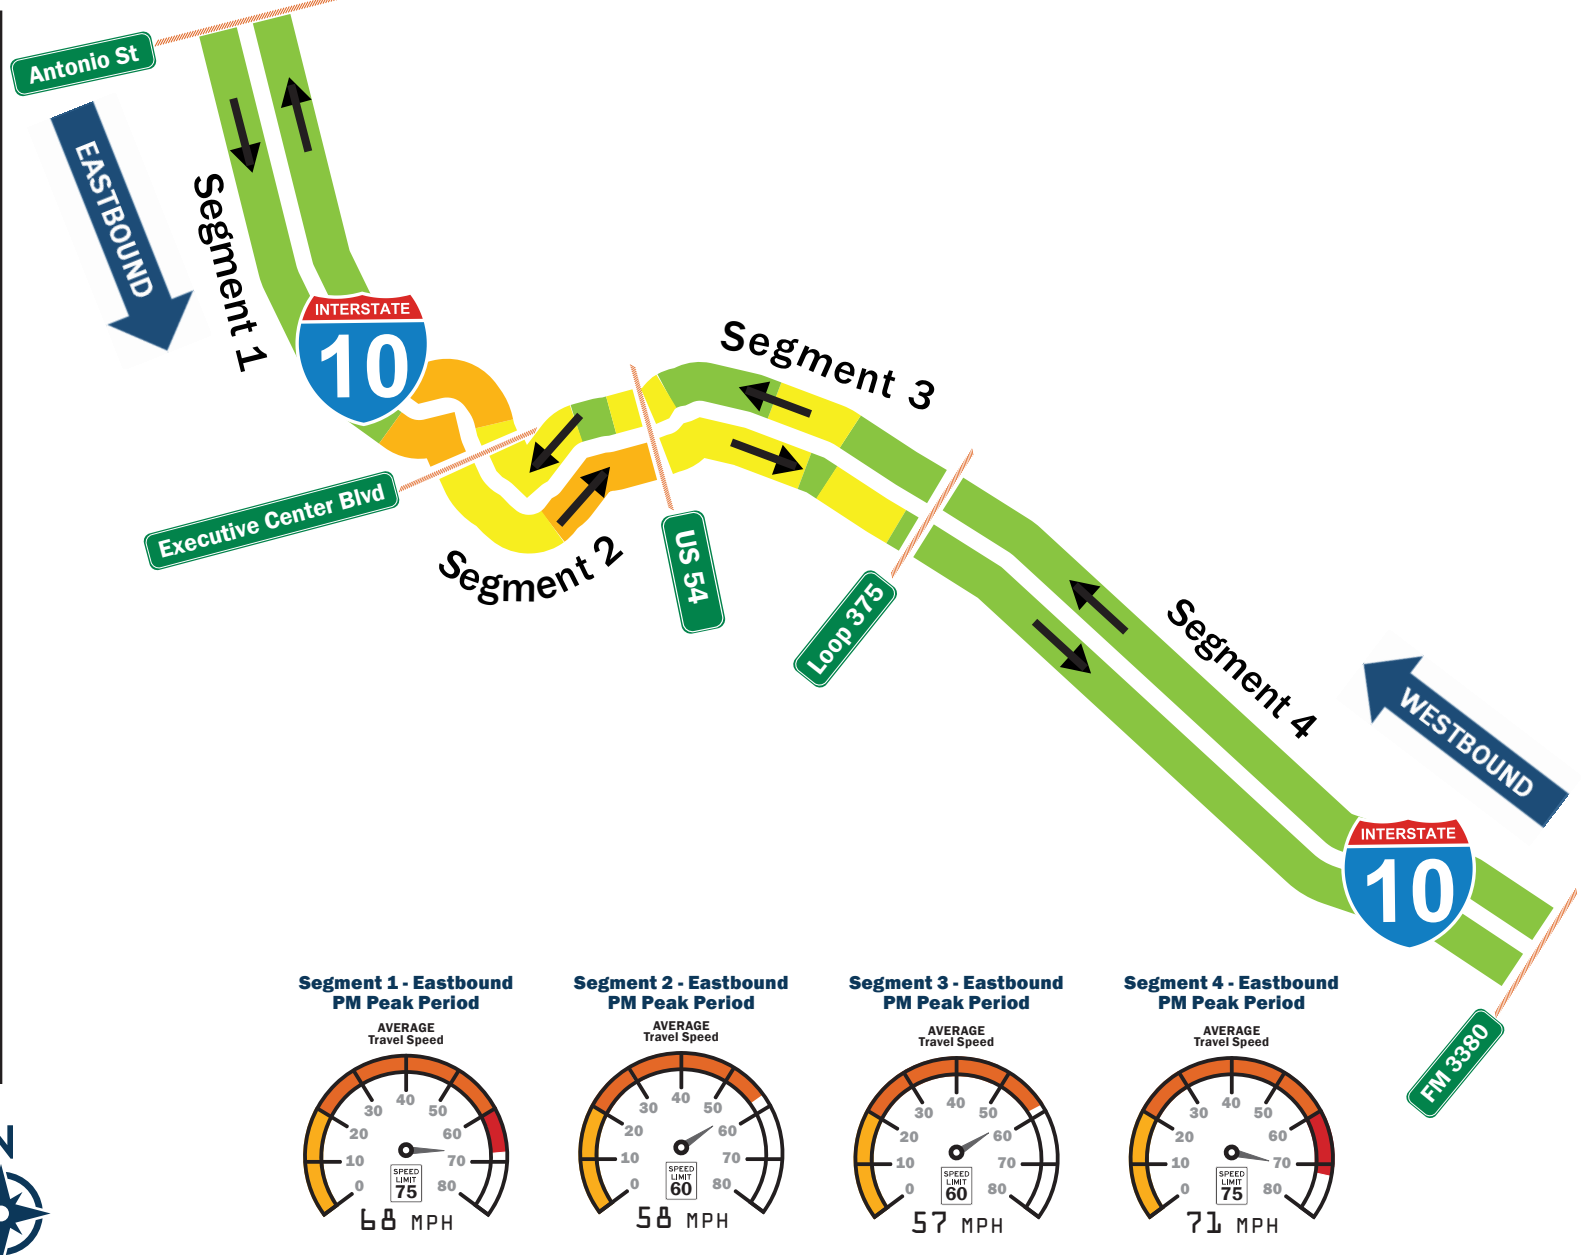

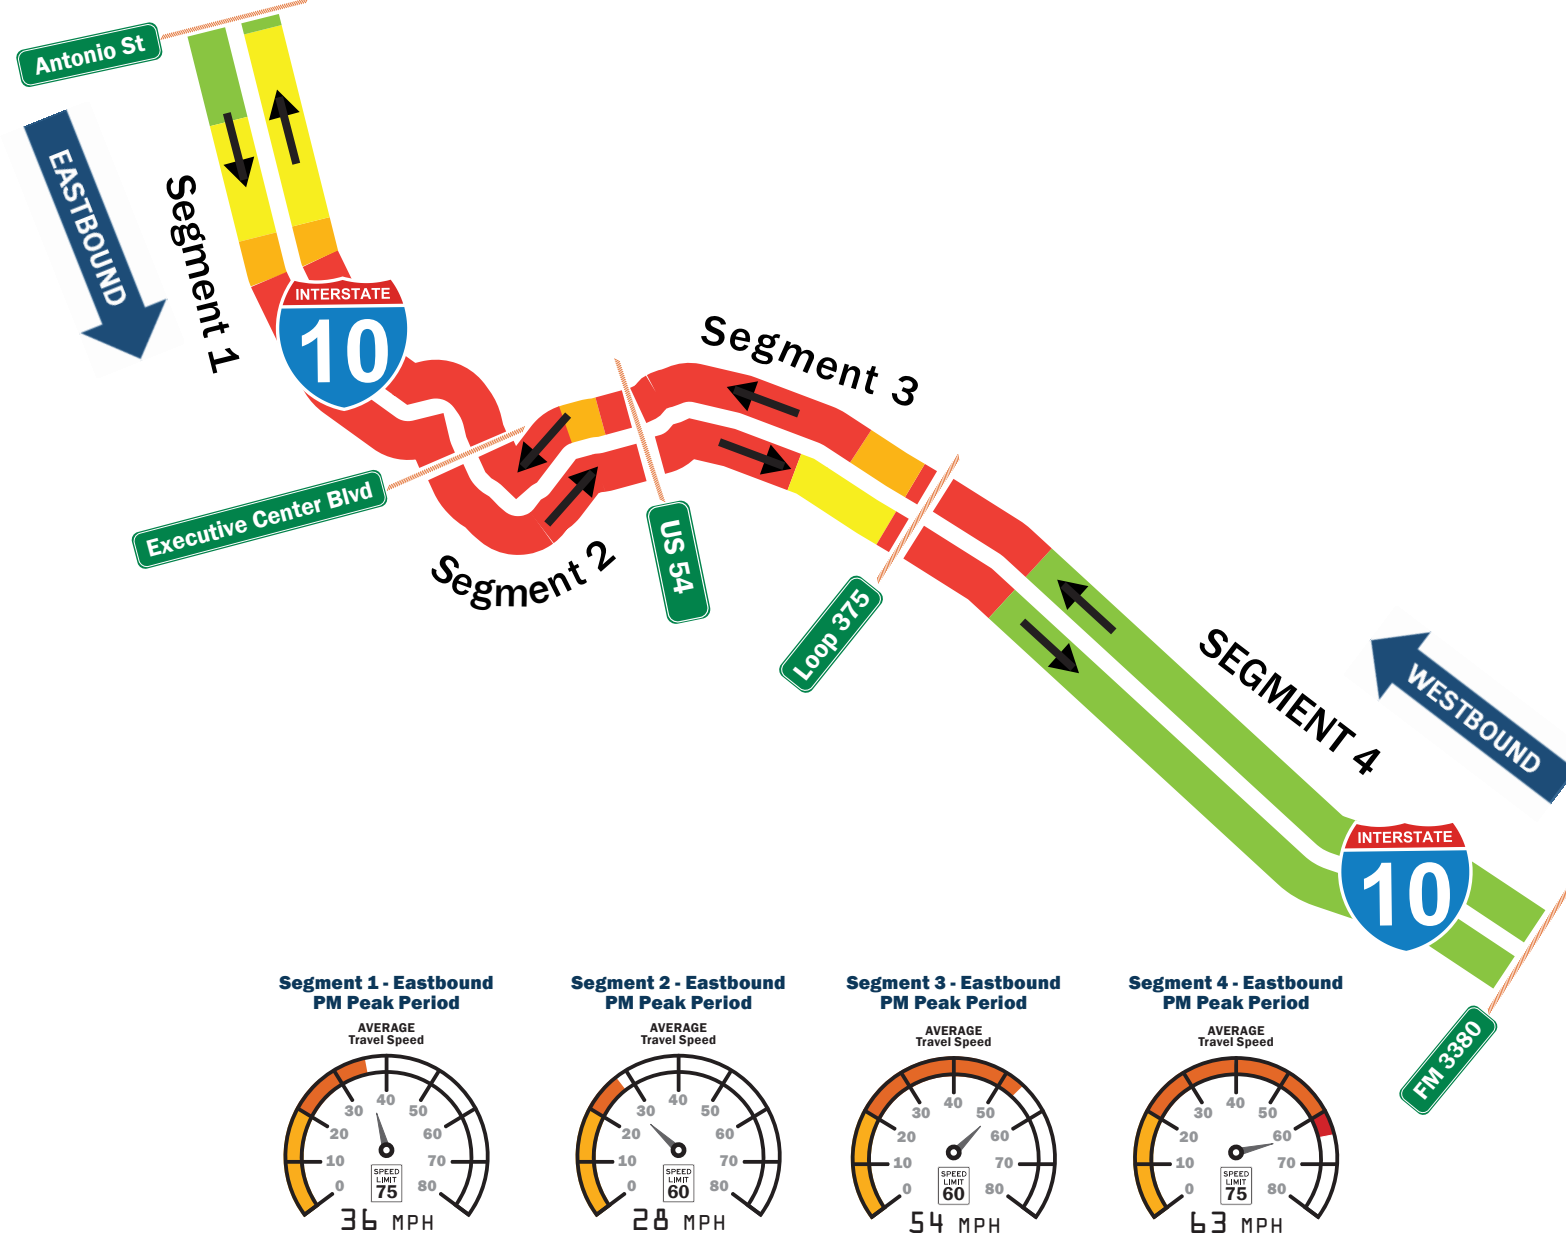

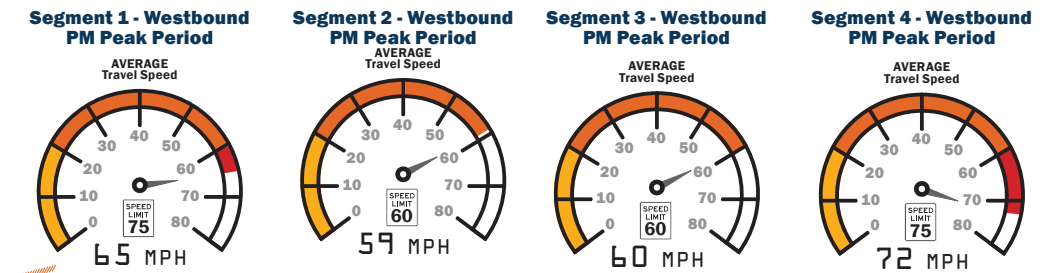

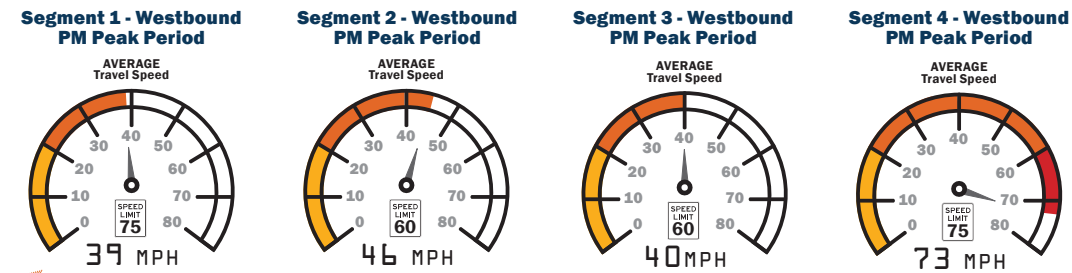

A qualitative measure used to analyze highways by categorizing traffic flow and assigning quality levels of traffic based here on the seconds of delay per vehicle

- LEVEL OF SERVICE AB & C**
Free flow, at or near free flow
- LEVEL OF SERVICE D**
Approaching unstable flow
- LEVEL OF SERVICE E**
Unstable flow, operating at capacity
- LEVEL OF SERVICE F**
forced or break-down flow

BUILD 2042 PEAK PERIOD*

The Build scenario implies that the latest operational and capacity improvements being evaluated are implemented by the year 2042. Refer to Reimaginei10.com for improvements.

*P.M. Peak Period hours

UBICACIÓN DE LOS PRÓXIMOS EVENTOS

martes, 6 de marzo del 2018
horario: 5 to 7 p.m.

El Paso Community College
Northwest Campus 6701 S
Desert Blvd.
El Paso, TX 79932

miércoles, 7 de marzo del 2018
horario: 5 to 7 p.m.

Mesita Elementary School,
Gimnasio 3307 N Stanton St.
El Paso, TX 79902

martes, 13 de marzo del 2018
horario: 5 to 7 p.m.

El Paso Multipurpose
Recreation Center 9031
Viscount Blvd
El Paso, TX 79925

miércoles, 14 de marzo del 2018
horario: 5 to 7 p.m.

Fabens High School, Gimnasio
601 NE Ave G
Fabens, TX 79838

GRACIAS

APRECIAMOS Y VALORAMOS SU PARTICIPACIÓN

Los eventos se realizarán en inglés. Si el inglés no es su primer idioma y tiene dificultades para comunicarse eficientemente en inglés, se proporcionará servicio de interpretación al español. Si usted tiene una discapacidad y necesita asistencia, se pueden hacer arreglos especiales para cubrir la mayoría de las necesidades. Si necesita arreglos distintos para asistir a los eventos, por favor comuníquese con la oficial de información pública de TxDOT El Paso District, Jennifer Wright, al (915) 790-4200 al menos dos días hábiles antes del evento. Si usted tiene cualquier pregunta o desea discutir detalles del proyecto, por favor póngase en contacto con Hugo Hernandez gerente del proyecto de TxDOT, al (915) 790-4200 o a través del correo electrónico Hugo.Hernandez@txdot.gov.

PRÓXIMOS EVENTOS

martes, 6 de marzo
horario: 5 to 7pm

miércoles, 7 de marzo
horario: 5 to 7pm

martes, 13 de marzo
horario: 5 to 7 pm

miércoles, 14 de marzo
horario: 5 to 7pm

REIMAGINE I-10

¿POR QUÉ REIMAGINE I-10?

Con cinco cruces internacionales entre Estados Unidos/México y el uso de la autopista I-10 como corredor principal de carga de este a oeste, el estudio Reimagine I-10, desde la línea estatal de NM hasta FM 3380 (Autopista Internacional Aguilera) es extremadamente importante no sólo para El Paso, sino para todos los alrededores. El Paso está experimentando un crecimiento y desarrollo significativo, pero su ubicación geográfica limita rutas alternativas, por lo que aumenta la demanda en el I-10.

El estudio está proponiendo actualmente tres niveles de mejora: operacional, ampliación, y tecnología.

Dentro de cada nivel, se considerarán soluciones tales como consolidación de rampa, capacidad adicional, y agrupación de camiones de carga. A medida que avanzamos a la fase de desarrollo alternativo estamos explorando soluciones que integren los objetivos del estudio. Consulte el mapa, en la siguiente página, para ver los escenarios Con Construcción y Sin Construcción.

METAS DEL PROYECTO

MOVILIDAD Y CIRCULACIÓN

Facilitar el movimiento a través de y dentro del

DISEÑO

Cumplir con estándares de diseño aceptados para así, proveer una instalación segura y de gran calidad.

MEDIO AMBIENTE

Diseñar con el fin de reducir Impactos al medio ambiente.

VALOR MONETARIO

Garantía de mejoras sustentables y balanceadas con respecto al costo y beneficios

INTERMODAL

Ofrecer alternativas innovadoras para el transporte.

TECNOLOGÍA

Uso de tecnologías avanzadas con la ventaja para corregir los problemas del corredor

Mapa con los Niveles de Servicio para el año 2042

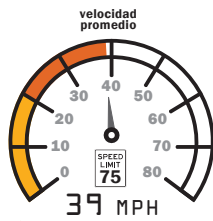

Sin construcción - El periodo pico (P.M.) en el 2042

Este escenario sugiere que no habrá mejoramiento adicionales a lo largo de corredor, excepto aquellos incluidos en los proyectos de construcción vigentes.

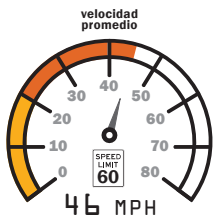

Nivel de Servicio
Una medida cualitativa utilizada para analizar carreteras al categorizar el flujo y asignar niveles de calidad de tráfico basados aquí en los segundos de retraso por vehículo

- AB & C** Flujo libre, en o cerca del flujo libre
- D** Flujo moderado, proximo a flujo inestable
- E** Flujo inestable, operando a limite de capacidad
- F** Flujo forzado, extremadamente inestable
